The affected age group was 6-78 years. 23 blood samples were tested at Gandhiji Health Care Home Private Hospital, Barwadih, out of which 11 tested positive for <i>Salmonella typhi</i> by the Widal test. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking

									water and food habits, hygiene and sanitation.
JH/SAH/2026/16/630	Jharkhand	Sahebganj	Malaria	21	0	16-04-2026	16-04-2026	Under Surveillance	Cases of fever with chills and body ache were reported from Village Barughutu, Sub-district Borio, District Sahibganj. District RRT investigated the outbreak. The affected age group was 3–60 years. House-to-house survey and active case search were conducted, and a medical camp was organized. A total of 21 blood samples were tested by Rapid Diagnostic Test (RDT) for malaria antigen. Of these, 18 samples tested positive for <i>Plasmodium falciparum</i> and 3 for <i>Plasmodium vivax</i> . Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
JH/WES/2026/16/631	Jharkhand	West Singhbhum	Chickenpox	12	0	13-04-2026	13-04-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Barkhandiya, Sub-District Goikera, District West Singhbhum. District RRT investigated the outbreak. Active search for fever cases was done. Cases were given symptomatic treatment. The affected age group was 20-35 years. 12 blood samples were tested at DPH Lab Sadar Hospital, Chaibasa. 2 were positive for chickenpox by IgM ELISA. Community awareness and health education given by the peripheral team on isolation of cases and spread of infection, hygiene and sanitation.

KN/BEN/2026/16/632	Karnataka	Bengaluru Rural	Acute Gastroenteritis	90	0	15-04-2026	15-04-2026	Under Surveillance	Cases of abdominal discomfort and nausea were reported from industrial establishments in Sub-District Devanahalli, District Bengaluru Rural. District RRT investigated the outbreak. Most cases were in the age group of 15-44 years. The outbreak was likely associated with consumption of food supplied by a common catering service. Cases were treated at health facilities. 2 water samples were tested at Budigere PHC and further in PHI and 7 stool samples were tested at BMCRI. Both water samples were found to be safe for potable purposes, and all stool samples were negative for vibrio cholera, no pathogens were isolated. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KN/GAD/2026/16/633	Karnataka	Gadag	Fever	35	0	13-04-2026	14-04-2026	Under Surveillance	Cases of fever were reported from Village Hanganakatti, Sub-District Gadag, District Gadag. District RRT investigated the outbreak. House-to-house fever surveillance was conducted. Both children and adults were affected. 2 serum samples were tested for Dengue NS1 antigen ELISA at DPHL Gadag, and both were negative. Peripheral smear for malaria (MP test) was conducted for 14 cases, and all were negative. Anti-Larval activities were done. Community awareness and health education given by the peripheral team

									on vector control measures, hygiene and sanitation.
KL/PAL/2026/16/634	Kerala	Palakkad	Suspected Food Poisoning	34	0	18-04-2026	18-04-2026	Under Surveillance	Cases of vomiting, loose motion, abdominal pain and fever were reported from Village Kuthannur-I, Sub-District Alathur, District Palakkad. District RRT investigated the outbreak. The affected age group was 4-76 years. Cases had consumed meals at a marriage function. Cases were treated at health facilities. Community awareness and health education given by the peripheral team on safe food habits, hygiene and sanitation.
KL/PAL/2026/16/635	Kerala	Palakkad	Hepatitis A	54	0	16-04-2026	18-04-2026	Under Surveillance	Cases of fever, vomiting, and fatigue were reported from Village Vadakkancherii (Ward 39 of Varode area), Sub-district Ottappalam, District Palakkad. District RRT investigated the outbreak. The affected age group was 3-39 years. House visits were conducted, super chlorination of water sources was carried out, and bleaching powder was distributed. 3 serum samples were sent to the District Public Health Laboratory for Hepatitis A IgM ELISA testing, of which 1 sample tested positive for Hepatitis A. 1 water sample collected from the public well and sent to KWA Palakkad showed the presence of coliforms and E. coli on bacteriological analysis. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.

KL/PAL/2026/16/636	Kerala	Palakkad	Jaundice	9	0	13-04-2026	13-04-2026	Under Surveillance	Cases of fever, acute jaundice, vomiting, anorexia, malaise, nausea and extreme fatigue were reported from Village Thekkummala, Sub-District Pattambi, District Palakkad. District RRT investigated the outbreak. House to house survey was done. Cases were treated at PHC Thiruvegappura. The affected age group was 9-25 years. 1 water sample was sent to Modern Biotech Water Testing Laboratory, Pattambi, for bacteriological testing, which revealed the presence of total coliforms and fecal coliforms. 2 serum samples were sent to the IPHA laboratory through the hub-and-spoke system for Hepatitis A Virus (HAV) ELISA testing, and the results were negative. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
MP/CHH/2026/16/637	Madhya Pradesh	Chhindwara	Acute Diarrhoeal Disease	28	0	16-04-2026	17-04-2026	Under Surveillance	Cases of loose motion and abdominal discomfort were reported from Village Saatbhaidhana, Sub-District Pandhurna, District Chhindwara. District RRT investigated the outbreak. Cases of all age group were affected. 9 water samples tested at PHED Lab were potable. Medicines were distributed in the affected area. Community

									awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
MP/DAM/2026/16/638	Madhya Pradesh	Damoh	Suspected Food Poisoning	17	0	11-04-2026	13-04-2026	Under Surveillance	Cases of vomiting, loose motion and abdominal cramps were reported from Village Mohra, Block Tendukheda, District Damoh. District RRT investigated the outbreak. People fell ill after consuming food (kheer and bharta) at a local religious gathering. Cases were in the age group 4-63 years. Cases were treated at CHC Tendukheda. 12 patients were treated at DH Damoh. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
MP/SEH/2026/16/639	Madhya Pradesh	Sehore	Hepatitis A	10	0	17-04-2026	17-04-2026	Under Surveillance	Cases of loss of appetite, nausea and abdominal pain were reported from Village Kothri, Sub-District Ashta, District Sehore. District RRT investigated the outbreak. Cases were students of VIT College. The affected age group was 19-21 years. Out of 10 blood samples collected and tested for Hepatitis A & E, 2 samples were positive for Hepatitis A (IgM ELISA) at AIIMS Bhopal. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.

MH/AMR/2026/16/640	Maharashtra	Amravati	Measles	6	0	17-04-2026	17-04-2026	Under Surveillance	Cases were reported from Village Tapalpura area under UHP Paratwada, Sub-District Achalpur, District Amravati. District RRT investigated the outbreak. The affected age group was 5–12 years. Active case search was carried out in the affected area. 6 blood samples collected, tested positive for Measles (IgM ELISA) at Kasturba Hospital, Mumbai Laboratory. An additional immunization session was conducted in the affected area. Community awareness and health education given by the peripheral team on isolation of cases and spread of infection, hygiene and sanitation.
MH/SAT/2026/16/641	Maharashtra	Satara	Jaundice	28	0	23-03-2026	17-04-2026	Under Surveillance	Cases of vomiting, fever, diarrhoea and yellow coloured urine were reported from Village Umbraj, Sub-District Karad, District Satara. District RRT investigated the outbreak. House to house survey was done. The affected age group was 2-60 years. Cases were treated at health facilities. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
OR/CUT/2026/16/642	Odisha	Cuttack	Jaundice	15	0	17-04-2026	17-04-2026	Under Surveillance	Cases of nausea, loss of appetite and yellow coloured urine were reported from Village Bhagatpur (Ward No 18), Sub-District Tangi, District Cuttack. District RRT investigated the outbreak. House to house survey was done. Cases

									were treated at PHC Bhagatpur. Cases were in the age group 5-55 years. 6 serum samples collected, tested positive for Hepatitis A (IgM ELISA). Chlorine tablets were distributed to the households. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
OR/KAL/2026/16/643	Odisha	Kalahandi	Acute Gastroenteritis	25	0	15-04-2026	15-04-2026	Under Surveillance	Cases of loose motion with abdominal pain were reported from Village Salegaon, Sub-District Sadar, District Kalahandi. District RRT investigated the outbreak. House to house survey was done. Cases were treated symptomatically. 6 patients were treated at CHC Borda and 4 at DH Kalahandi. All cases recovered. The most affected age group was 5-14years. 12 water samples and 5 rectal swab samples were collected and tested at DPHL Kalahandi. Water samples were tested by H ₂ S OT methods, while rectal swab samples were tested by culture. Rectal swab culture yielded <i>E. coli</i> and <i>Salmonella</i> species. Water samples were H ₂ S positive with OT <0.001 ppm. The suspected source was food poisoning at the canteen. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.

OR/SON/2026/16/644	Odisha	Sonepur	Hepatitis A	10	0	17-04-2026	18-04-2026	Under Surveillance	Cases of nausea, loss of appetite and yellow coloured urine were reported from Village Kaintara, Sub-District Binika, District Sonepur. District RRT investigated the outbreak. House to house survey was done. Cases were treated at PHC Mahadevpali. Cases were in the age group 4-14 years. Out of 10 serum samples collected, 8 samples tested positive for Hepatitis A (IgM ELISA). Chlorine tablets were distributed to the households. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
OR/SUN/2026/16/645	Odisha	Sundargarh	Acute Diarrhoeal Disease	35	0	14-04-2026	14-04-2026	Under Surveillance	Cases of loose motion with abdominal pain were reported from Village Ranakata, Sub-District Hatibari, District Sundargarh. District RRT investigated the outbreak. A house-to-house survey was done. Medicine and ORS packets were given to the cases. The most affected age group was 15-44years. 2 water samples and 2 rectal swab samples were collected and tested at DPHL Sundergarh. Water samples were tested by H ₂ S OT methods, while rectal swab samples were tested by culture. Rectal swab culture yielded <i>E. coli</i> and <i>Salmonella</i> species. Water samples were H ₂ S positive with OT <0.001 ppm. Chlorination of water

									sources was done. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.
UP/PRA/2026/16/646	Uttar Pradesh	Prayagraj	Suspected Food Poisoning	23	0	15-04-2026	17-04-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Belhat, Sub-District Koraon, District Prayagraj. District RRT investigated the outbreak. Cases were students of government primary school who fell ill after eating prasad distributed in the school. All cases were treated symptomatically. Cases were in the age group 6-14 years. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
UT/BAG/2026/16/647	Uttarakhand	Bageshwar	Measles	5	0	14-04-2026	13-04-2026	Under Control	Cases of fever with rash were reported from Village Chachai, Sub-District Kapkot, District Bageshwar. District RRT investigated the outbreak. The affected age group was 5-11 years. 5 serum samples were collected and sent to GMCH Haldwani VRDL for Measles IgM, out of which 4 samples tested positive. Affected children were vaccinated. Active surveillance, Vitamin A supplementation and MR vaccination activities were conducted in the affected area. Community awareness and health education given by the peripheral team on isolation of cases and spread of infection, hygiene and sanitation.

UT/CHA/2026/16/648	Uttarakhand	Chamoli	Measles	11	0	10-04-2026	13-04-2026	Under Surveillance	Cases of fever with rash were reported from Village Purna and Nand Keshari, Sub-District Dewal, District Chamoli. District RRT investigated the outbreak. The affected age group was 5-10 years. 5 serum samples were tested at STH Haldwani. 3 samples tested positive for Measles by IgM ELISA. All children aged 9 months to 10 years were administered an additional dose of MR vaccine and 2 doses of Vitamin A. Community awareness and health education given by the peripheral team on isolation of cases and spread of infection, hygiene and sanitation.
WB/PAR/2026/16/649	West Bengal	24 Paraganas North	Acute Diarrhoeal Disease	102	0	10-04-2026	13-04-2026	Under Control	Cases of loose motion, abdominal pain and vomiting were reported Merlin 5th Avenue, Mahishbathan (Ward 28), Bidhannagar Municipal Corporation, Sub-District Rajarhat, District 24 Paraganas North. District RRT investigated the outbreak. Population of the affected area was approximately 1000. The residential complex had 5 Towers. Probable cause of the outbreak was contaminated water. A medical camp was established. All cases were given medicines and ORS packets. Both children and adults were affected. Fecal coliforms were present in the overhead reservoirs of tower 3, 4, 5 and tube well outlet. 8 water samples collected from tower 2 tested positive for faecal

									contamination by H2S strip. Overhead tanks were cleaned. Chlorination of water sources was done. People were advised to use boiled water for drinking purpose. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.
WB/ALI/2026/16/650	West Bengal	Alipurduar	Chickenpox	6	0	14-04-2026	14-04-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Bholar Dabri (CT), Sub-District Alipurduar-I, District Alipurduar. District RRT investigated the outbreak. Active search for fever cases was done. Symptomatic treatment was given to cases. Most of the cases were in the age group 5-60 years. 5 Blood Serum samples were collected and sent to VRDL NBMCH for Chickenpox IgM Elisa testing. Out of 5 samples, 1 sample tested positive for Chickenpox. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
WB/COO/2026/16/651	West Bengal	Coochbehar	Acute Diarrhoeal Disease	24	0	15-04-2026	16-04-2026	Under Control	Cases of loose motion and vomiting were reported from Village Bara Salbari, Sub-District Tufanganj - II, District Coochbehar. District RRT investigated the outbreak. House to house survey was done. Cases were treated symptomatically. 14 patients were treated at SD Hospital Tufanganj. Most of the cases were in the age group 15-44 years. 5 stool samples collected and sent to MJN MC&H showed growth

									of normal gut flora. Chlorine tablets were distributed to the households. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
WB/MED/2026/16/652	West Bengal	Medinipur East	Acute Diarrhoeal Disease	38	0	12-04-2026	13-04-2026	Under Control	Cases of loose motion and vomiting were reported from Village Kishor Chak, Sub-District Kolaghat, District Medinipur East. District RRT investigated the outbreak. House to house survey was done. Cases were treated at PHC Nandaigajan. Most of the cases were in the age group 5-60 years. 2 stool sample collected & sent to Tamralipta Govt Medical College tested negative for cholera (Microscopy Hanging Drop Preparation). Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.

DISEASE OUTBREAKS OF PREVIOUS WEEKS REPORTED LATE

Unique ID.	Name of State-UT	Name of District	Disease-Illness	No. of Cases	No. of Deaths	Date of Start Outbreak	Current Status	Comments- Action Taken
KN/UTT/2026/16/653	Karnataka	Uttar Kannada	Measles	18	0	15-01-2026	Under Surveillance	Cases were reported from Bhatkal town and surrounding areas including Shiralli, Sub-District Bhatkal, District Uttar Kannada. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. The affected age group was 3-14 years. 18 serum samples were tested at National Institute of Virology, Bengaluru. 8 serum samples tested positive for measles by PCR. Community awareness and health education given by the peripheral team on isolation of cases and spread of infection, hygiene and sanitation.

KL/ERN/2026/16/654	Kerala	Ernakulam	Hepatitis A	9	0	07-04-2026	Under Surveillance	Cases of fever, jaundice, abdominal pain, nausea, and vomiting were reported from Village Aluva East, Sub-District Aluva, District Ernakulam. District RRT investigated the outbreak. Cases were students of KMEA College. Cases were in the age group 20 to 21 years. Cases were treated at FHC Edathala. 2 serum samples were sent to the RPH Laboratory, Ernakulam, for HAV IgM ELISA testing, of which both samples tested positive. 2 water samples collected, tested positive for <i>E. coli</i> . Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
WB/PUR/2026/16/655	West Bengal	Purulia	Measles	17	0	01-04-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from five Sub-Centre areas of Sub-District Kashipur, District Purulia. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. The affected age group was 10 months to 32 years. Out of 17 serum samples collected and sent to IOS, Kolkata, 8 samples tested positive for Measles (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.

WB/PUR/2026/16/656	West Bengal	Purulia	Measles	19	0	01-04-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Shankara (CT), Sub-District Para, District Purulia. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. The affected age group was 8 months to 7 years. Out of 16 serum samples collected and sent to IOS Kolkata, tested positive for Measles (IgM ELISA).
