District wise disease alerts-outbreaks reported in the 18th week 2026

18th Week Map

Unique ID.	Name of State-UT	Name of District	Disease- Illness	No. of Cases	No. of Deaths	Date of Start of Outbreak	Date of Reporting	Current Status	Comments- Action Taken
AP/ANA/2026/18/691	Andhra Pradesh	Anakapalli	Acute Gastroenteritis	31	0	25-04-2026	29-04-2026	Under Surveillance	Cases of loose motion were reported from Village Godicherla, Sub-District Nakkapalli, District Anakapalli. District RRT investigated the outbreak. House to house survey was done. Probable cause of the outbreak was contaminated water. Cases were treated at PHC Godicherla. ORS packets were given to cases. 2 water samples tested at the Regional Public Health Laboratory and 4 water samples tested at RWS were found satisfactory. Additionally, 2 stool samples tested at AMC Visakhapatnam showed <i>E. coli</i> in 1 sample, while the other sample was negative for pathogenic organisms. The affected age group was 5-60 years. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
AP/SRI/2026/18/692	Andhra Pradesh	Sri Sathya Sai	Acute Gastroenteritis	24	0	27-04-2026	27-04-2026	Under Surveillance	Cases of vomiting and loose motions were reported from Village Kodihalli, Sub-District Agali, District Sri Sathya Sai. District RRT investigated the outbreak. Cases had consumed food from a marriage function. The affected age group

									was 6-70 years. House to house survey was done. 3 stool samples were tested at DPHL Laboratory, Hindupur, and no pathogenic organisms were isolated. 4 water samples tested at RWS, of which 1 sample was found unsatisfactory. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
AS/BAR/2026/18/693	Assam	Barpeta	Measles	12	0	27-04-2026	29-04-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Balapathar, Sub-District Kalgachia, District Barpeta. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Most cases were in the age group 0-20 years. 4 serum samples were collected and tested at GMCH laboratory. Measles and rubella were tested by IgM ELISA. 1 sample tested positive for Measles. Rest all tested negative for both. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
AS/DAR/2026/18/694	Assam	Darrang	Chickenpox	10	0	29-04-2026	29-04-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Gadhiapara, Sub-District Mangaldoi (Pt), District Darrang.

									District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Cases were in the age group 11-13 years. 4 serum samples collected and sent to GMCH and IPHL, Darrang, tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
AS/LAK/2026/18/695	Assam	Lakhimpur	Chickenpox	5	0	29-04-2026	29-04-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Chaboti Keshasal, Sub-District Kadam, District Lakhimpur. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Cases were in the age group 10-45 years. 3 blood samples collected and sent to DPHL, Telahi Model Hospital, Lakhimpur, for <i>Varicella zoster</i> virus testing by IgM ELISA. All 3 samples were found to be positive for VZV. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.

GJ/KHE/2026/18/696	Gujarat	Kheda	Suspected Food Poisoning	16	0	27-04-2026	28-04-2026	Under control	Cases of loose motion, vomiting and abdominal pain were reported from Village Dawapura, Sub-District Nadiad, District Kheda. District RRT investigated the outbreak. House to house survey was done. Cases fell ill after eating food at a marriage function. Medicine was given to cases. Cases were in the age group 2-65 years. All cases recovered. Community awareness and health education given by the peripheral team on safe food habits, hygiene and sanitation.
HR/KAR/2026/18/697	Haryana	Karnal	Measles	14	0	29-04-2026	29-04-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Banso Gate, Sub-District and District Karnal. District RRT investigated the outbreak. Active search for fever cases was done. Symptomatic treatment was given to cases. Cases were in the age group 5-14 years. Out of 14 serum samples collected and sent to PGIMER Chandigarh, 1 sample tested positive for Measles (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
HR/KUR/2026/18/698	Haryana	Kurukshetra	Acute Diarrhoeal Disease	12	0	01-05-2026	01-05-2026	Under Surveillance	Cases of loose watery stools were reported from Didar Nagar area, Sub-District: Thanesar, District: Kurukshetra. District RRT investigated the outbreak. House to

									house survey was done. Pipeline leakages were observed in the locality. Cases were treated at UPHC Krishna Nagar Gamri. ORS packers were given to cases. The affected age group was 5-15 years. 5 stool samples were collected for cholera investigation and tested at Karnal Laboratory. All samples tested negative. Pipeline leakages were repaired by PHED. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
JK/SRI/2026/18/699	Jammu and Kashmir	Srinagar	Hepatitis A	22	0	30-04-2026	30-04-2026	Under Surveillance	Cases of abdominal pain, nausea, anorexia and yellow coloured urine were reported from Village Khimber, Sub-District Srinagar (North), District Srinagar. District RRT investigated the outbreak. House to house survey was done. Cases were treated at NTPHC Chatterhama. The affected age group was 7-17 years. 5 blood samples collected and sent to DPHL JLNH Hospital Srinagar, tested positive for Hepatitis A (IgM ELISA). 2 water samples collected for bacteriology testing, were potable. KL/THR/2026/18/720	Kerala	Thrissur	West Nile Fever	1	0	12-04- 2026	Under Surveillance	A 16-years-old female from Village Peramangalam (CT), Sub-District and District Thrissur developed acute onset of fever and headache on 12 April 2026, followed by rapid neurological deterioration leading to unconsciousness. The patient was admitted to Government Medical College Hospital, Thrissur on 15 April 2026, where MRI findings on 19 April 2026 were suggestive of meningoencephalitis. Subsequently, the patient was shifted to Amrita Hospital, Kochi on 19 April 2026 for further management. Laboratory investigations confirmed Acanthamoeba infection (PCR positive), Serum sample collected tested positive for West Nile Virus (IgM ELISA). The patient is currently admitted in Amrita Hospital and has been shifted from ICU to the ward. She is presently on Ryle's tube feeding and responding to verbal commands. Severe muscle weakness is present in both upper and lower limbs, and physiotherapy treatment and rehabilitation are being continued at Amrita Hospital. Environmental assessment revealed risk factors including mosquito breeding-prone areas and exposure to untreated water sources. Public health responses included active fever surveillance, environmental assessment, planned water chlorination, and community awareness on early symptoms, hygiene, safe water practices, and vector control. IEC activities and intersectoral coordination have been
---------------------------	---------------	-----------------	----------------------------	----------	----------	------------------------	-------------------------------	---

								initiated, and the situation is under continuous monitoring
RJ/BUN/2026/18/721	Rajasthan	Bundi	Measles	5	0	09-04-2026	Under control	Cases of fever with maculopapular rash were reported from Village Bhawarda, Sub-District and District Bundi. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Out of 5 blood samples collected and sent to SMS Lab Jaipur, 4 samples tested positive for Measles (IgM ELISA). Vitamin A solution was given to cases. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
WB/MUR/2026/18/722	West Bengal	Murshidabad	Measles	23	0	15-03-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Madda, Sub-District Beldanga - I, District Murshidabad. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Majority of the cases were below 10 years of age. Out of 6 serum samples collected, 3 samples tested positive for Measles (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.

WB/MUR/2026/18/723	West Bengal	Murshidabad	Measles	7	0	09-04-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Mahisha Thali, Sub-District Samserganj, District Murshidabad. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. The affected age group was 5 months to 6 years. Out of 6 serum samples collected, 2 samples tested positive for Measles (IgM ELISA).
