District RRT investigated the outbreak. Cases fell ill after eating food at a local festival. Cases were treated symptomatically. The affected age group was 22-70 years. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
CT/KON/2026/19/726	Chhattisgarh	Kondagaon	Acute Diarrhoeal Disease	46	0	02-05-2026	04-05-2026	Under Control	Cases of loose motion and vomiting were reported from Village Dongarigura, Sub-District Kondagaon, District Kondagaon.

									District RRT investigated the outbreak. Cases developed symptoms after consuming food at a marriage ceremony. A medical camp was established in the village. Cases were given medicine and ORS packets. 20 patients were treated at health facilities. Both children and adults were affected. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
DL/NEW/2026/19/727	Delhi	New Delhi	Measles	6	0	30-04-2026	04-05-2026	Under Surveillance	Cases of fever with rash were reported from Barar Square Jhuggi Cluster, New Delhi. District RRT investigated the outbreak. The affected age group was 5 months to 16 years. Out of 6 serum samples collected and sent to NCDC Delhi, 2 samples tested positive for Measles (IgM ELISA). Community awareness and health education given by the peripheral team on spread of infection and isolation of cases, hygiene and sanitation.
GJ/AHM/2026/19/728	Gujarat	Ahmadabad	Suspected Food Poisoning	10	0	03-05-2026	04-05-2026	Under Control	Cases of loose motion were reported from Village Astodia, Sub-district Jamalpur, District Ahmadabad. District RRT investigated the outbreak. Active case surveillance was carried out. The affected age group was 7-60 years. All had a common history of consuming food at a family function. 2 water samples collected, were potable. Community awareness and health education given by the peripheral team on safe

									drinking water and food habits, hygiene and sanitation.
JK/JAM/2026/19/729	Jammu and Kashmir	Jammu	Suspected Typhoid	16	0	05-04-2026	05-05-2026	Under Surveillance	Cases of fever with nausea and abdominal pain were reported from Village Janipur, Sub-District and District Jammu. District RRT investigated the outbreak. House to house survey was done. Cases were treated at UPHC Roop Nagar and UPHC Janipur. Cases were in the age group 1-80 years. 16 blood samples collected from 20.04.2026 to 04.05.2026, tested positive for <i>S. typhi</i> by widal test. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
JK/KUP/2026/19/730	Jammu and Kashmir	Kupwara	Measles	6	0	08-05-2026	08-05-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Khurhama, Sub-District Lalpora, District Kupwara. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Cases were in the age group 11 months to 11 years. Out of 6 serum samples collected and sent to DPHL Kupwara, 2 samples tested positive for Measles (IgM ELISA). Community awareness and health education given by the peripheral team on spread of disease and isolation of cases, hygiene and sanitation.
JH/DUM/2026/19/731	Jharkhand	Dumka	Chickenpox	10	0	04-05-2026	05-05-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Tarni, Sub-District Gopikandar, District

									Dumka. District RRT and Block team investigated the outbreak. The affected age group was 10 months - 40 years. Out of 4 blood samples tested at DPHL Dumka, 3 samples were positive for <i>V. zoster</i> by IgM ELISA. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
JH/GOD/2026/19/732	Jharkhand	Godda	Chickenpox	7	0	04-05-2026	04-05-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Modi Chak, Sub-District Mahagama, District Godda. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. The affected age group was 4-19 years. 7 blood samples collected, tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene and sanitation.
JH/JAM/2026/19/733	Jharkhand	Jamtara	Measles	6	0	02-05-2026	04-05-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Petari, Sub-District Narayanpur, District Jamtara. District RRT investigated the outbreak. Active search for fever cases was done. Cases were given symptomatic treatment. Cases were in the age group 1 to 14 years. 6 serum samples collected and sent to RIMS Ranchi, tested positive for Measles (IgM ELISA). Vitamin A solution was given to cases. Community awareness and health education was

									given by the peripheral team on isolation of cases, hygiene and sanitation.
JH/LAT/2026/19/734	Jharkhand	Latehar	Suspected Typhoid	17	0	05-05-2026	05-05-2026	Under Surveillance	Cases of fever with loss of appetite, vomiting and bodyache were reported from Villages Jungur, Matloun, Bandua, Bakoria, Pokhri and Kui, Sub-District Manika, District Latehar. District RRT investigated the outbreak. House to house survey was done. Cases were treated at CHC Manika. Both children and adults were affected. 17 blood samples collected from 01.05.2026 to 09.05.2026, tested positive for S. typhi by widal test. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/ALA/2026/19/735	Kerala	Alappuzha	West Nile Fever	1	0	06-05-2026	07-05-2026	Under Surveillance	A 68-years-old female was reported from Puthanpurackal House, Village Kanjikkuzhi (CT), Sub-District Cherthala, District Alappuzha. District RRT investigated the outbreak. The patient developed mild fever and severe tiredness on 29-04-2026 and initially sought treatment at St. Jude Private Clinic, Kanjikkuzhi. As symptoms persisted, she revisited the clinic on 30-04-2026. Later that evening, her condition worsened with extreme fatigue and subsequent seizures, following which she was

									taken to Muhamma CHC and referred to MCH Vandanam. No similar illness was reported among family members. Travel history revealed a visit to Pathirappally on 25-04-2026 for a postfuneral ceremony. She was admitted to Government TD Medical College Hospital, Vandanam on 01-05-2026, and West Nile Virus IgM tested positive on 05-05-2026. The patient was discharged in stable condition on 15.05.2026. Fever surveillance, vector study, entomological investigation, and source reduction activities have been initiated to prevent further transmission. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/KAN/2026/19/736	Kerala	Kannur	Hepatitis A	30	0	30-04-2026	05-05-2026	Under Surveillance	Cases of nausea, abdominal pain and loss of appetite were reported from Village Pattiom (CT) ward 8, Sub-District Thalassery, District Kannur. District RRT investigated the outbreak. Epidemiological investigation suggested that the probable source of outbreak was food and drinks consumed at a family get-together attended two weeks prior to the onset of illness. Cases were treated at CHC Pattiam. The affected age group was 1-35 years. 6 serum samples collected, tested positive for Hepatitis A (IgM ELISA). Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking

									water and food habits, hygiene and sanitation.
KL/KOT/2026/19/737	Kerala	Kottayam	Dengue	12	0	09-05-2026	09-05-2026	Under Surveillance	Cases of fever with muscle pain and headache were reported from Village Velloor, Sub-District Vaikom, District Kottayam. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at FHC Velloor. The affected individuals were in the age group 5 to 75 years. 5 serum samples collected, tested positive for Dengue (IgM ELISA). Anti-larval activities were done. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
KL/KOT/2026/19/738	Kerala	Kottayam	Hepatitis A	11	0	07-05-2026	09-05-2026	Under Surveillance	Cases of abdominal pain, nausea, fever, yellow coloured urine were reported from Village Palampura, Sub-District Kanjirappally, District Kottayam. District RRT investigated the outbreak. House to house survey was done. Cases were treated at FHC Parathodu. Cases were in the age group 11 to 45 years. 1 serum sample collected, tested positive for Hepatitis A (IgM ELISA). Chlorination of water supply was done by PHED. Water samples collected from well water showed the presence of E.coli. Community awareness and health education was given by the peripheral

									team on safe drinking water and food habits, hygiene and sanitation.
KL/THR/2026/19/739	Kerala	Thrissur	Dengue	18	0	30-04-2026	06-05-2026	Under Surveillance	Cases of fever with muscle pain were reported from Village Ayyanthole, Sub-District and District Thrissur. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at FHC Ayyanthole. Both children and adults were affected. 18 blood samples collected from 14.04.2026 to 23.04.2026, tested positive for Dengue (IgM ELISA - 1, NS1 Ag ELISA - 2 and Rapid NS1 - 15) Entomological surveys revealed elevated vector indices. Source reduction activities and fogging was done. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/THR/2026/19/740	Kerala	Thrissur	Dengue	9	0	30-04-2026	06-05-2026	Under Surveillance	Cases of fever, headache, myalgia were reported from Thrikkumarakudam Colony, Ward 52, Kanattukara area of Thrissur Corporation, Sub-District and District Thrissur. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at General Hospital Thrissur. The affected age group was 25-64 years. 3 blood samples collected, tested positive for Dengue (Rapid NS1 Antigen). Field investigation revealed mosquito breeding in plastic bottles, plastic drums, garden pots, and money plant containers. Source reduction activities and fogging was

									done. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/THR/2026/19/741	Kerala	Thrissur	Hepatitis A	18	0	05-05-2026	05-05-2026	Under Surveillance	Cases of abdominal pain, nausea, fever, yellow coloured urine were reported from Pentark South Park Apartment Complex, Sakthan Thampuran Nagar, Sub-District Thrissur, District Thrissur. District RRT investigated the outbreak. House to house survey was done. The apartment complex consists of three blocks with around 60 occupied households. Field investigation and environmental assessment identified inadequate cleaning of water storage tanks, leakage in pipes connected to septic tanks, and close proximity between septic tanks and water tanks, suggesting possible drinking water contamination as the likely source of infection. Cases were treated at CHC Ollur. The affected age group was 3-71 years. 18 serum samples collected from 26.03.2026 to 10.05.2026, tested positive for HepatitiS A (IgM ELISA). Control measures including super chlorination of wells, fever surveillance, environmental inspection, health education, and continuous monitoring were undertaken. Residents were advised to use boiled and chlorinated drinking water and maintain personal and food hygiene. Coordination with Corporation and apartment authorities was initiated for corrective measures including cleaning of water

									storage facilities and repair of sanitation pipeline leakages.
LA/LEH/2026/19/742	Ladakh	Leh Ladakh	Shigellosis	15	0	04-05-2026	07-05-2026	Under Control	Cases of loose motion and vomiting were reported from Village Sankar Yourtung, Sub-District Leh, District Leh Ladakh. District RRT investigated the outbreak. House to house survey was done. Cases were students of Lamdon School Leh. Medicine and ORS packets were given to cases. 8 patients were treated at SNM Hospital. Cases were in the age group 6-40 years. Out of 5 stool samples collected and sent to DPHL Lab SNM hospital Leh, 3 samples tested positive for <i>Shigella</i> by culture. Chlorine tablets were distributed to the households. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
MP/CHH/2026/19/743	Madhya Pradesh	Chhindwara	Acute Gastroenteritis	32	0	06-05-2026	08-05-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Borgaon, Sub-District Sausar, District Chhindwara. District RRT investigated the outbreak. Cass developed symptoms 4-5 hours after consuming food at a marriage function. Cases were treated at CHC Saunsar. All cases recovered. Both children and adults were affected. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
MP/DAM/2026/19/744	Madhya Pradesh	Damoh	Measles	5	0	04-05-2026	06-05-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Puranakheda Hatta, Sub-District

									Hatta, District Damoh. District RRT investigated the outbreak. Active search for fever cases was done. Cases were given symptomatic treatment. The affected age group was 2-8 years. Out of 10 serum samples collected and sent to Nirth lab Jabalpur, 5 samples tested positive for Measles (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MP/HOS/2026/19/745	Madhya Pradesh	Hoshangabad	Acute Diarrhoeal Disease	11	0	03-05-2026	05-05-2026	Under Surveillance	Cases of loose motion were reported from Village and Sub-District Bankhedi urban, District Hoshangabad. District RRT investigated the outbreak. House to house survey was done. Medicine and ORS packets were given to cases. Cases were in the age group 5-35 years. 2 stool samples collected, tested negative for cholera by culture. Chlorine tablets were distributed to the households. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
MN/IMP/2026/19/746	Manipur	Imphal West	Chickenpox	32	0	03-05-2026	08-05-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Langol Ningthou, Sub-District Lamphelpat, District Imphal West. District RRT investigated the outbreak. Active search for fever cases was done. Cases were students of Savio School, Iroishemba. All cases were given symptomatic treatment. The affected age group was 5-14 years. Cases were

									clinically diagnosed with chickenpox. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MZ/AIZ/2026/19/747	Mizoram	Aizawl	Suspected Food Poisoning	14	0	10-05-2026	10-05-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Maubuang, Sub-District Aibawk, District Aizawl. District RRT investigated the outbreak. House to house survey was done. Cases developed symptoms after eating Telhawng (local delicacy eaten with rice) sold door to door by a vendor.
