District RRT investigated the outbreak. Cases were in the age group of 5-14 years. The cases had consumed bitter bottle gourd in a mid-day meal. Symptomatic treatment was provided to the cases. A water sample was tested at IPHL, Darrang, for MPN and H2S test and was found to be satisfactory for drinking. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
AS/DHU/2026/20/767	Assam	Dhubri	Measles	11	0	11-05-2026	13-05-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Jhalar Alga Pt.I, Sub-District Dhubri and District Dhubri. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Most of the cases were children. Out of 5 blood and throat swab samples collected, 3 samples tested positive for Measles (IgM ELISA). Vitamin A solution was given to cases. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
AS/DIB/2026/20/768	Assam	Dibrugarh	Suspected Food Poisoning	18	0	15-05-2026	16-05-2026	Under Surveillance	Cases of vomiting, dizziness, vertigo, and unconsciousness were reported from Villages Tinsukia Gaon and Kutuha Nagaon, Sub-District Dibrugarh West, District Dibrugarh. District RRT investigated the outbreak. Cases were in the age group of 14-78 years. The cases had consumed immature and contaminated silkworm pupa. House-to-house visits and ORS distribution were conducted. The cases were treated at Lazai

									Kalakhowa Model Hospital, AMCH, Apeksha Nursing Home, Barbaruah BPHC and Damanis Nursing Home. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
AS/TAM/2026/20/769	Assam	Tamulpur	Malaria (P. vivax)	300	0	08-05-2026	11-05-2026	Under Surveillance	Cases of fever with chills were reported from No. 2 Pipleni Village, Kalchini Village and Nagrijuli Tea Garden Area under No. 2 Dangargaon Village, District Tamulpur. District RRT investigated the outbreak. House to house fever survey was done. A medical camp was established in the affected area. Cases were treated with anti-malarial medicine. Fogging was done and ITBN were distributed to the households. All age groups were affected. 4154 blood samples were tested at Nagrijuli Model Hospital from 13.04.2026 to 15.06.2026, of which 300 samples tested positive for <i>Plasmodium vivax</i> by Rapid Diagnostic Test (RDT). Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
BH/GAY/2026/20/770	Bihar	Gaya	Acute Diarrhoeal Disease	10	0	11-05-2026	11-05-2026	Under Surveillance	Cases of vomiting and loose motion were reported from Village Gurua, Sub-District Gurua, District Gaya. District RRT investigated the outbreak. House to house survey was done. Medicine and ORS packets were given to cases. The affected age group was 13-36 years. 5 stool samples were collected and sent to ANMMCH, Gaya for testing. 4 samples showed growth of <i>Salmonella species</i> and 1 sample tested positive for <i>E. coli</i> by culture. Chlorine tablets were distributed to the households. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.

CT/DUR/2026/20/771	Chhattisgarh	Durg	Acute Diarrhoeal Disease	61	0	11-05-2026	12-05-2026	Under Surveillance	Cases of diarrhea and vomiting were reported from Village Belodi, Sub-District Patan, District Durg. District and Block RRT investigated the outbreak. Door-to-door surveillance was conducted. Both children and adults were affected. 2 stool samples were sent to the Govtkarn. Chandulal Chandrakar Medical College, Kacchandur. No positive findings were reported. 8 water samples were sent to Govt. Chandulal Chandrakar Medical College, Kachandur and PHE lab. 2 samples were contaminated with <i>E. coli</i> and Coliform. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
CT/SAR/2026/20/772	Chhattisgarh	Sarangarh Bilaigarh	Acute Diarrhoeal Disease	58	0	11-05-2026	11-05-2026	Under Control	Cases of loose motions were reported from Village Reda, Sub-District Sarangarh, District Sarangarh Bilaigarh. District RRT investigated the outbreak. The affected age group was <5-59 years. Cases were treated at CHC Sarangarh. Chlorine tablets were distributed to the households. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
GJ/SAB/2026/20/773	Gujarat	Sabar Kantha	Suspected Food Poisoning	130	0	13-05-2026	13-05-2026	Under Surveillance	Cases of abdominal pain and vomiting were reported from Village Umbora, Sub-District Khedbrahma, District Sabar Kantha. District RRT investigated the outbreak. The affected age group was 1-60 years. The cases had consumed some food from a religious programme. 2 stool samples were tested at DPHL Himatnagar and no positive findings were reported. The cases were treated at CHC Lambadiya, CHC Matoda, SDH Khedbrahma and two cases were referred to GMERS Himmatnagar. Medicines and ORS were provided to the affected people. Community awareness and health education given by the

									peripheral team on safe drinking water and food habits, hygiene and sanitation.
HR/KAR/2026/20/774	Haryana	Karnal	Measles	5	0	08-05-2026	15-05-2026	Under Surveillance	Cases of fever with rash were reported from Gali No. 2, Vasant Vihar, Sub-District Karnal, District Karnal. District RRT investigated the outbreak. The affected age group was 3-13 years. 5 serum samples were tested at PGIMER Chandigarh. 1 sample was positive for Measles virus by IgM ELISA. The cases were vaccinated for Measles. Community awareness and health education given by the peripheral team on isolation of cases and spread of disease, hygiene and sanitation.
HR/KAR/2026/20/775	Haryana	Karnal	Measles & Rubella	10	0	09-05-2026	15-05-2026	Under Surveillance	Cases of fever with rash were reported from Village Newal, Sub-District Indri, District Karnal. District RRT investigated the outbreak. The affected age group was 12-18 years. 6 serum and throat swab samples were tested at PGIMER Chandigarh (4) and NCDC Delhi (2) for culture. 4 were positive for Measles and 2 were positive for Rubella. The cases were vaccinated only for Measles but not for Rubella. Community awareness and health education given by the peripheral team on isolation of cases and spread of disease, hygiene and sanitation.
JK/BAR/2026/20/776	Jammu and Kashmir	Baramulla	Hepatitis A	25	0	11-05-2026	11-05-2026	Under Surveillance	Cases of fever and loss of appetite were reported from Village Behrampora, Sub-District Danghiwacha, District Baramulla. District RRT investigated the outbreak. The affected age group was 3-34 years. 16 blood samples and 4 water samples were tested at DPHL IDSP Baramulla for confirmation of Hepatitis A and E. 8 blood samples were found positive for Hepatitis A (IgM ELISA). Water samples were found unsatisfactory for drinking purpose based on bacteriological

									examination and MPN count. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
JK/RAJ/2026/20/777	Jammu and Kashmir	Rajauri	Suspected Food Poisoning	8	1	16-05-2026	16-05-2026	Under Surveillance	Cases of abdominal pain, nausea and loose motion were reported from Village Mohra, Sub-District Koteranka, District Rajauri. District RRT investigated the outbreak. The affected age group was 6-60 years. Cases presented with symptoms after consumption of a locally grown vegetable. Initially, cases were treated at CHC Kandi and later referred to Govt. Medical College Rajouri. House-to-house visits were conducted in the affected village, and medical assistance was provided. 1 death occurred in a 60-year-old male on 16.05.26 with severe dehydration. Water samples were collected and tested at DPHL, GMC Rajouri were found unsatisfactory for consumption. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
JK/SRI/2026/20/778	Jammu and Kashmir	Srinagar	Fever with Rash	14	0	13-05-2026	15-05-2026	Under Surveillance	Cases of rash, fever and malaise were reported from Village Soura, Sub-District Srinagar (North), District Srinagar. District RRT investigated the outbreak. The cases were from the Govt Girls Middle School, Soura. The affected age group was 7-13 years. The administration of the school was advised to close the affected classes with home isolation for 5 to 7 days. The cases were treated symptomatically. Community awareness and health education given by the peripheral team on isolation of cases and spread of disease, hygiene and sanitation.

JH/EAS/2026/20/779	Jharkhand	East Singhbhum	Malaria	48	0	14-05-2026	14-05-2026	Under Surveillance	Cases of fever with bodyache were reported from Village Basadera, Sub-District Ghatshila, District East Singhbhum. District RRT investigated the outbreak. The affected age group was 4-65 years. Blood samples from all 48 cases were tested by Rapid Diagnostic Test for malaria antigen. 25 samples tested positive for <i>Plasmodium falciparum</i> , 3 for <i>Plasmodium vivax</i> , and 2 showed mixed infection. Anti-larval spraying was done in the village. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
JH/SAR/2026/20/780	Jharkhand	Saraikela Kharsawan	Chickenpox	5	0	11-05-2026	11-05-2026	Under Surveillance	Cases of fever, bodyache, headache and rashes were reported from Village Sini (CT), Sub-District Saraikela, District Saraikela Kharsawan. District RRT investigated the outbreak. The affected age group was 12-38 years. 5 blood samples were tested at MGM Medical College Hospital. All samples were positive for Varicella-Zoster Virus (VZV) IgG by ELISA (paired sera testing). Community awareness and health education given by the peripheral team on isolation of cases and spread of disease, hygiene and sanitation.
KN/KOL/2026/20/781	Karnataka	Kolar	Acute Diarrhoeal Disease	25	0	16-05-2026	16-05-2026	Under Surveillance	Cases were reported from Village Neelatur, Sub-District Srinivasapur, District Kolar. District RRT investigated the outbreak. Both children and adults were affected. The cases had consumed food at a birthday party in a house. 2 stool samples and 2 water samples were tested at DPHL Kolar. 2 stool samples were found negative for <i>Vibrio cholerae</i> and 2 water samples were found to be safe for potable purposes. All affected individuals were treated promptly, and field investigation and surveillance were conducted to identify

									additional cases. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/ERN/2026/20/782	Kerala	Ernakulam	Dengue	21	0	11-05-2026	12-05-2026	Under Surveillance	Cases of fever with myalgia and fatigue were reported from Village Cheranallur (CT), Sub-District Kanayannur, District Ernakulam. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at FHC Cheranalloor. The affected age group was 17-73 years. 21 serum samples collected from 24.04.26 to 12.06.26 and sent to RPH Lab Ernakulam, tested positive for Dengue (IgM ELISA - 1, RT-PCR - 1, Rapid NS1 - 18). Anti-larval activities and fogging was done. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
KL/IDU/2026/20/783	Kerala	Idukki	Dengue	27	0	15-05-2026	15-05-2026	Under Surveillance	Cases of fever with fatigue and myalgia were reported from Village Santhanpara, Sub-District Udumbanchola, District Idukki. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at PHC Santhanpara. The affected age group was 19-82 years. Out of 27 serum samples collected from 17.04.2026 to 16.05.2026, 26 samples tested positive for Dengue (IgM ELISA). Anti-larval activities and fogging was done. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/IDU/2026/20/784	Kerala	Idukki	Acute Gastroenteritis	111	0	13-05-2026	13-05-2026	Under Surveillance	Cases of nausea and loose motions were reported from Arakulam area Sub-District Thodupuzha, District Idukki. District RRT

									investigated the outbreak. The affected age group was 13-20 years. Cases were students who fell ill after eating food served at Compat Annual Training Camp, Arakulam. All cases were treated symptomatically. 4 stool samples collected, tested negative for Salmonella and Shigella species. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/IDU/2026/20/785	Kerala	Idukki	Suspected Food Poisoning	23	0	09-05-2026	12-05-2026	Under Control	Cases of loose motion, vomiting and abdominal pain were reported from Mens Hostel, Government Medical College Idukki, Sub-District and District Idukki. District RRT investigated the outbreak. Cases developed symptoms after eating food at the hostel mess. Cases were treated symptomatically. The affected age group was 20–24 years. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
KL/KAN/2026/20/786	Kerala	Kannur	Hepatitis A	15	0	14-05-2026	15-05-2026	Under Surveillance	Cases of nausea, loss of appetite and yellow coloured urine were reported from Ward No. 2, Kariyil area, Village Peravoor Sub-District Iritty, District Kannur. District RRT investigated the outbreak. House to house survey was done. Probable cause of the outbreak was food shared to households during house warming ceremony. Cases were treated at TH Peravoor. Environmental investigation revealed coliform contamination in drinking water sources. The affected age group was 6-40 years. 3 blood samples collected tested positive for HAV IgM card test. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on

									safe food habits and drinking water, hygiene and sanitation.
KL/KOT/2026/20/787	Kerala	Kottayam	Dengue	11	0	15-05-2026	16-05-2026	Under Surveillance	Cases of fever with muscle pain were reported from Village Thalappalam (ward 11), Sub-District Meenachil, District Kottayam. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at PHC Thalappalam. 2 patients were hospitalized. Out of 11 serum samples collected, 10 samples tested positive by NS1 Antigen ELISA and 1 sample by IgM ELISA. The affected age group was 8- 63 years. Anti-larval activities and fogging was done. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
KL/KOT/2026/20/788	Kerala	Kottayam	Hepatitis A	28	0	14-05-2026	14-05-2026	Under Surveillance	Cases of anorexia, abdominal pain and yellow coloured urine were reported from Villages Vattachal (ward 19) and Kurumbanadom (ward 2), Sub-District Changanassery, District Kottayam. District RRT investigated the outbreak. House to house survey was done. Probable source of the outbreak was contaminated drinking water supplied by a vendor. Cases were treated at FHC Madapally. The affected age group was 7-37 years. All 28 serum samples collected, tested positive for Hepatitis A (IgM ELISA). Chlorination of water sources was done. People were advised to use boiled water for drinking purpose. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/KOT/2026/20/789	Kerala	Kottayam	Dengue	16	0	08-05-2026	11-05-2026	Under Surveillance	Cases of fever with muscle pain and fatigue were reported from Valyath area (Ward 13), Sub-District Meenachil, District Kottayam. District RRT investigated the outbreak. House to house fever survey was done. Cases

									were treated at PHC Kadanad. 2 patients were treated at IPD. The affected age group was 12-65 years. All 16 serum samples collected, tested positive for Dengue (NS1 Antigen ELISA). Anti-larval activities were done in the affected area. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
KL/KOZ/2026/20/790	Kerala	Kozhikode	Dengue	22	0	12-05-2026	13-05-2026	Under Surveillance	Cases of fever, headache and joint pain were reported from Village Chakkittapara (Ward 1), Sub-District Koyilandi, District Kozhikode. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at The affected age group was 13-76 years. 4 blood samples were tested at MCH Kozhikode. All 4 tested positive for Dengue by IgM ELISA. Entomological indices revealed: Breteau Index – 12, House Index – 8, and Container Index – 8.6. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/MAL/2026/20/791	Kerala	Malappuram	Hepatitis A	22	0	12-05-2026	15-05-2026	Under Surveillance	Cases of abdominal pain, nausea, loss of appetite and yellow coloured urine were reported from Village Marakkara, Sub-District Tirur, District Malappuram. District RRT investigated the outbreak. House to house survey was done. The affected age group was 3-52 years. Cases had attended a common function on 31.03.2026. Consumption of welcome drinks prepared using water from an open well was considered the most likely source of infection. Cases were treated at health facilities. 2 serum samples collected and sent to DPHL Malappuram, tested positive for Hepatitis A (IgM ELISA). Water samples collected from

									the well showed the presence of coliform bacteria, Chlorination of water sources was carried out. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/MAL/2026/20/792	Kerala	Malappuram	Hepatitis A	13	0	14-05-2026	15-05-2026	Under Surveillance	Cases of fever with abdominal discomfort were reported from Wards 5 and 3 of Village Kurumbalangode, Sub-District Nilambur, District Malappuram. District RRT investigated the outbreak. House to house survey was done. Cases were treated at health facilities. The affected age group was 7-40 years. 2 serum samples collected, tested positive for Hepatitis A (IgM ELISA). Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/MAL/2026/20/793	Kerala	Malappuram	Acute Gastroenteritis	25	0	08-05-2026	13-05-2026	Under Surveillance	Cases of abdominal pain, loose stools and vomiting were reported from Village Omanur, Sub-District Kondotty, District Malappuram. District RRT investigated the outbreak. Cases developed symptoms after eating at a function. The majority of the cases were in the age group 21–30 years. Cases were treated symptomatically. ORS packets were given to cases. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/MAL/2026/20/794	Kerala	Malappuram	Hepatitis A	42	0	09-05-2026	11-05-2026	Under Surveillance	Cases of fever with abdominal discomfort and nausea were reported from Ward 16 of Vazhakkad Panchayat, Sub-District Kondotty, District Malappuram. District RRT investigated the outbreak. Cases were in the age group 15-24 years. Cases had gathered for a housewarming function. The cases had

									consumed water from the contaminated wells. Water samples collected from the well, tested positive for E. coli. Out of 5 serum samples collected and sent to DPHL Malappuram, 2 samples tested positive for Hepatitis A (IgM ELISA). Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/PAL/2026/20/795	Kerala	Palakkad	Jaundice	10	0	15-05-2026	16-05-2026	Under Surveillance	Cases of nausea, abdominal pain and loss of appetite were reported from Village Mannarkad-I (CT), Sub-District Mannarkad, District Palakkad. District RRT investigated the outbreak. House to house survey was done. Cases were treated at PHC Kumaramputhur. Cases were in the age group 10-15 years. Sample was not collected. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe food habits and drinking water, hygiene and sanitation.
MP/EAS/2026/20/796	Madhya Pradesh	East Nimar	Chikungunya	49	0	13-05-2026	13-05-2026	Under Surveillance	Cases of fever with joint pain were reported from Village Kuksi Ryt, Sub-District Harsud, District East Nimar. District RRT investigated the outbreak. The affected age group was 11-76 years. 11 blood samples were tested at District Hospital Khandwa. 8 samples were positive for Chikungunya virus by IgM ELISA. Larvae and pupae of Aedes mosquitoes were found in the stored water in the houses, and were destroyed by Temophose. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
MP/GWA/2026/20/797	Madhya Pradesh	Gwalior	Measles	6	0	13-05-2026	14-05-2026	Under Surveillance	Cases of fever with rash were reported from KRH Government hospital, Gwalior, District Gwalior. District RRT investigated the

									outbreak. The affected age group was 9 months - 14 years. Out of 5 serum samples collected, 2 samples tested positive for Measles (IgM ELISA). Community awareness and health education given by the peripheral team on isolation of cases and spread of infection, hygiene and sanitation.
MP/KAT/2026/20/798	Madhya Pradesh	Katni	Chickenpox	9	0	14-05-2026	15-05-2026	Under Surveillance	Cases of fever with rash were reported from Village Piprodh, Block Kanhwara, District Katni. District and Block RRT investigated the outbreak. House-to-house survey was conducted. The affected age group was 4 months-30 years. 4 blood samples collected, tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education given by the peripheral team on isolation of cases and spread of infection, hygiene and sanitation.
MP/MAN/2026/20/799	Madhya Pradesh	Mandsaur	Suspected Food Poisoning	36	0	12-05-2026	12-05-2026	Under Surveillance	Cases of vomiting and loose motion were reported from Village Kothada Buzurg, Sub-District Garoth, District Mandsaur. District RRT investigated the outbreak. House to house survey was done. The affected age group was 11 months-65 years. The cases had consumed locally prepared kulfi. Cases were treated at health facilities. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
MP/SAT/2026/20/800	Madhya Pradesh	Satna	Chickenpox	25	0	14-05-2026	14-05-2026	Under Surveillance	Cases of fever with rash were reported from Villages Buderua and Rigra, Sub-District Maihar, District Satna. District and Block RRT investigated the outbreak. Active case search was conducted. The affected age group was 2 years-33 years. Cases were treated symptomatically. 1 serum sample collected, tested positive for <i>V. zoster</i> (IgM

									ELISA). Community awareness and health education given by the peripheral team on isolation of cases and spread of infection, hygiene and sanitation.
MH/NAG/2026/20/801	Maharashtra	Nagpur	Acute Diarrhoeal Disease	102	0	14-05-2026	14-05-2026	Under Surveillance	Cases of loose motion and vomiting were reported from Village Ingole Nagar, Sub-District Panvel, District Nagpur. District RRT investigated the outbreak. House to house survey was done. Probable cause of the outbreak was well water contaminated with sewage seepage. Cases were treated at NGMC Hudkeshwar. Both children and adults were affected. 10 water samples were tested at the Regional Public Health Laboratory, Nagpur. 1 sample of well water and 1 sample from a water camper/tanker were found to be contaminated and unfit for drinking purposes. Superchlorination of the well water was done. People were advised to use boiled water for drinking purpose. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
MH/SIN/2026/20/802	Maharashtra	Sindhudurg	Acute Diarrhoeal Disease	80	0	16-05-2026	16-05-2026	Under Surveillance	Cases of loose watery stools were reported from Village Shivapur, Sub-District Kudal, District Sindhudurg. District RRT investigated the outbreak. House to house survey was done. Medicine and ORS packets were given to cases. Both children and adults were affected. 2 stool samples and 8 water samples were tested at DPHL, Sindhudurg. Both stool samples were negative for Vibrio cholerae. All 8 water samples were found to be contaminated (coliform counts exceeding 16 per 100 ml). Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.

MG/EAS/2026/20/803	Meghalaya	East Jaintia Hills	Hepatitis A	33	0	15-05-2026	15-05-2026	Under Surveillance	Cases of fever, diarrhoea and jaundice were reported from Village Narwan, Sub-District Saipung, District East Jaintia Hills.
