2022 2023 2024 2025 2026

Unique ID.	Name of State-UT	Name of District	Disease- Illness	No. of Cases	No. of Deaths	Date of Start of Outbreak	Date of Reporting	Current Status	Comments- Action Taken
AS/DAR/2026/21/821	Assam	Darrang	Suspected Food Poisoning	32	0	18-05-2026	18-05-2026	Under Surveillance	Cases of abdominal discomfort and loose stools were reported from Villages Dakhin Chuburi, Bhuktabari, Lekharupar and Byas Para, Sub-District Sipajhar, District Darrang. District RRT investigated the outbreak. The affected age group was 7-70 years. The cases had consumed food at a religious function. Cases were treated at health facilities. 3 rectal swabs were collected and culture was done at IPHL, Darrang. No growth was seen. 1 tubewell water sample was tested at IPHL, Darrang Lab and was satisfactory for drinking. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
AS/LAK/2026/21/822	Assam	Lakhimpur	Suspected Food Poisoning	12	0	22-05-2026	22-05-2026	Under Surveillance	Cases of fever, headache, abdominal pain, vomiting and loose motion were reported from Village Alimur Chapori, Sub-district Kadam, District Lakhimpur. District and Block RRT investigated the outbreak. The cases had consumed <i>prashad</i> at a religious gathering. The outbreak was provisionally diagnosed as suspected food poisoning. 3 rectal swab samples were tested by culture and sensitivity at DPHL, IDSP Lakhimpur, and all showed normal growth of E. coli after 48 hours of aerobic incubation. 1 water sample tested by H ₂ S and MPN methods was reported as intermediate

									for drinking purposes (7 MPN/100 ml). ORS and other medications were provided to the patients. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
AS/SON/2026/21/823	Assam	Sonitpur	Acute Diarrhoeal Disease	14	0	18-05-2026	19-05-2026	Under Surveillance	Cases of loose motion were reported from Village No.1 Sonajuli TE, Sub-District Chariduar, District Sonitpur. District with Block RRT investigated the outbreak. House to house survey was done. Medicine and ORS packets were given to cases. The affected age group was 1-40 years. 3 rectal swab samples and 2 water samples were tested at DPHL Sonitpur Lab. Stool samples showed no enteropathogens after 48 hours of culture. Water samples were found to be unsatisfactory on MPN testing. PHED treated all water sources. Drainage systems were cleaned, and an alternate source of drinking water was provided. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
AS/TAM/2026/21/824	Assam	Tamulpur	Suspected Food Poisoning	32	0	17-05-2026	18-05-2026	Under Surveillance	Cases of abdominal discomfort and loose stools were reported from Village Dighilipar, Sub-District Tamulpur, District Tamulpur. District RRT investigated the outbreak. Cases developed symptoms after eating food at a religious festival. Symptomatic treatment was given to cases. 5 patients were treated at CHC Goreswar. 5 stool samples were

									tested by culture, and all showed growth of Salmonella Typhi. All cases recovered. Both children and adults were affected. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
BH/NAL/2026/21/825	Bihar	Nalanda	Suspected Food Poisoning	32	0	20-04-2026	20-05-2026	Under Control	Cases of loose motion, vomiting and abdominal pain were reported from Village Nagarnausa, Sub-District Nagar Nausa, District Nalanda. District RRT investigated the outbreak. Cases were students who fell ill after eating food at a mid-day meal. Cases were treated at PHC Nargarnausa. All cases recovered. The affected age group was 12-14 years. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
BH/SAR/2026/21/826	Bihar	Saran	Fever with Rash	8	0	14-05-2026	20-05-2026	Under Surveillance	Cases of fever with rash were reported from Village Rasidpur, Sub-District Manjhi, District Saran. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. 8 serum samples collected and sent to AIIMS Patna, tested negative for Measles (IgM ELISA). Cases were in the age group 9-26 years. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
CT/RAJ/2026/21/827	Chhattisgarh	Rajnandgaon	Measles	12	0	12-05-2026	21-05-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Kumarda, Sub-District Chhuriya,

									District Rajnandgaon. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Out of 6 serum samples collected, 1 sample tested positive for Measles (IgM ELISA). Cases were in the age group 0-30 years. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
GJ/RAJ/2026/21/828	Gujarat	Rajkot	Acute Gastroenteritis	16	0	20-05-2026	20-05-2026	Under Surveillance	Cases of vomiting, fatigue and sweating were reported from Village Kharachia, Sub-District Upleta, District Rajkot. District RRT investigated the outbreak. The affected age group was 2-71 years. Cases had consumed puffs and buttermilk during travel. All cases were admitted to SDH Upleta, where they received IV fluids and symptomatic treatment. The suspected source of infection was buttermilk. ORS packets were given to cases. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.

JK/JAM/2026/21/829	Jammu and Kashmir	Jammu	Suspected Food Poisoning	19	0	18-05-2026	18-05-2026	Under Surveillance	Cases of fever, vomiting, loose motion & stomach pain were reported from Village Sainik Colony, Sub-District Jammu, District Jammu. District RRT investigated the outbreak. Cases developed symptoms after consuming food at a community function (Sukhmani Path). Symptomatic treatment was given to cases. 15 patients were treated at Government Hospital, Gandhi Nagar Jammu. All cases recovered. The affected age group was 9-80 years. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
JK/UDH/2026/21/830	Jammu and Kashmir	Udhampur	Cholera	2	0	23-05-2026	23-05-2026	Under Surveillance	Cases of loose motions, vomiting and fatigue were reported from Village Barmeen and Hartryan and Barmeen, Sub-District Ramnagar, District Udhampur. District RRT investigated the outbreak. The affected age group was 45-59 years. The affected population was under active surveillance, and house-to-house surveillance was conducted in the affected area. Out of 9 stool samples collected and tested at DPHL Udhampur, 2 samples tested positive for <i>V. cholerae</i> by culture. 2 water samples collected, were non potable. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.

JK/UDH/2026/21/831	Jammu and Kashmir	Udhampur	Cholera	2	0	23-05-2026	23-05-2026	Under Surveillance	Cases were reported from Village Udhampur and Bali Lower, Sub-District Chenani, District Udhampur. District RRT investigated the outbreak. The affected age group was 15-44 years. House-to-house surveillance was conducted in the affected area. Out of 4 stool samples collected and sent to DPHL Udhampur, 2 samples tested positive for <i>V. cholerae</i> by culture. 2 water samples collected, were non potable. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
JH/DUM/2026/21/832	Jharkhand	Dumka	Measles	7	0	20-05-2026	21-05-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Mahulidih, Sub-District Masalia, District Dumka. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. 7 serum samples collected and sent to RIMS Ranchi. 2 samples tested positive for Measles (IgM ELISA). Cases were in the age group 9-62 years. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
JH/EAS/2026/21/833	Jharkhand	East Singhbhum	Chickenpox	6	0	23-05-2026	23-05-2026	Under Surveillance	Cases of fever with rash were reported from Village Beharipur, Sub-District Chakulia, District East Singhbhum. District RRT investigated the outbreak. Active search for fever

									cases was done. Cases were treated symptomatically. Out of 3 serum samples collected and sent to MGM Medical College, 2 samples tested positive for <i>V. zoster</i> (IgM ELISA). Cases were in the age group 11-81 years. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
JH/JAM/2026/21/834	Jharkhand	Jamtara	Chickenpox	5	0	22-05-2026	22-05-2026	Under Surveillance	Cases were reported from Village Jhilua, Sub-District Narayanpur, District Jamtara. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. 4 serum samples collected and sent to RIMS Ranchi, tested positive for <i>V. zoster</i> (IgM ELISA). Cases were in the age group 9-19 years. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper
JH/LOH/2026/21/835	Jharkhand	Lohardaga	Chickenpox	10	0	18-05-2026	19-05-2026	Under Surveillance	Cases of fever with rash were reported from Village Bhunjanja, Sub-District Lohardaga, District Lohardaga. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Out of 9 serum samples collected and sent to RIMS Ranchi, 2 samples tested positive for <i>V. zoster</i> (IgM ELISA). Cases were in the age group 2-68 years. Community awareness and health education was

									given by the peripheral team on isolation of cases, hygiene maintenance and proper
KL/ERN/2026/21/836	Kerala	Ernakulam	West Nile Fever	1	0	18-05-2026	19-05-2026	Under Surveillance	A case was reported from Division 66, Kochi Corporation, District Ernakulam. District RRT investigated the outbreak. 8 suspected cases were reported from different areas of LSGDs in the period from 11.03.26 to 26.04.26. An 8-year-old child developed high-grade fever on 13.04.26, followed by headache and vomiting. The child was initially taken to W&C Hospital, Mattancherry, and was subsequently referred to Government Medical College, Ernakulam, due to neck stiffness and was admitted on 16.04.2026. Serum, plasma and CSF samples were tested at NIV, where West Nile IgM was reported positive on 22.04.2026. Her second serum sample tested at NIV Alleppey for PRNT test, was found to be positive for West Nile virus. The patient was discharged on 03.05.2026. 10 serum samples collected from the affected area were tested by PCR, and all samples were negative. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/ERN/2026/21/837	Kerala	Ernakulam	West Nile Fever	1	0	18-05-2026	19-05-2026	Under Surveillance	A case was reported from Ward 49, Thrippunithura Municipality, Sub-District Kanayannur, District Ernakulam. District RRT investigated the outbreak. 8 suspected cases reported from different areas of

									LSGDs in the period from 11.03.26 to 26.04.26. A 43-year-old female developed symptoms and was admitted to Renai Medcity on 04.04.2026 with fever, multiple episodes of vomiting, giddiness, and gait ataxia involving the right upper limb. Her CSF sample was collected from Renai Medi city and tested at NIV Alleppey, and the IgM antibody was positive on 16.04.26. Serum sample collected after 14 days of the first sample was tested for the PRNT test at NIV Alappuzha was found to be positive for West Nile virus infection. The patient was discharged on 28.04.2026. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/KOZ/2026/21/838	Kerala	Kozhikode	Dengue	24	0	20-05-2026	20-05-2026	Under Surveillance	Cases of fever, headache, fatigue and joint pain were reported from Village Changaroth, Sub-District Koyilandi, District Kozhikode. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at FHC Changaroth. Most cases were adults. Out of 6 blood samples sent for confirmation to RPHL, Kozhikode, all tested positive for dengue by IgM ELISA/NS1 antigen ELISA. Anti-larval activities and fogging was done. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.

KL/PAL/2026/21/839	Kerala	Palakkad	Dengue	85	0	21-05-2026	22-05-2026	Under Surveillance	Cases of fever with fatigue and body pain were reported from Village Kottoppadam-I, Sub-District Mannarkad, District Palakkad. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at PHC Kottoppadam. The most affected age group was 10-60 years. 16 blood samples were tested by ELISA at IPHL Palakkad, of which 9 samples tested positive for Dengue. Anti-larval activities and fogging was done. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
MP/EAS/2026/21/840	Madhya Pradesh	East Nimar	Chikungunya	18	0	20-05-2026	20-05-2026	Under Surveillance	Cases of fever with joint pain were reported from Village Phiphariya, Sub-District Punasa, District East Nimar. District RRT investigated the outbreak. House to house fever survey was done. Population of the affected area was 660. Cases were treated at CHC Mundi. Cases were in the age group 18-70 years. 9 serum samples collected, tested positive for chikungunya (IgM ELISA). Anti-larval activities and fogging was done. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
MP/JAB/2026/21/841	Madhya Pradesh	Jabalpur	Fever with Rash	5	0	22-05-2026	22-05-2026	Under Surveillance	Cases of fever with rash were reported from Village Kanti, Sub-District Patan, District Jabalpur.

									District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. 5 serum samples collected, tested negative for Measles (IgM ELISA). Cases were in the age group 4-24 years. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MP/SAT/2026/21/842	Madhya Pradesh	Satna	Measles	8	0	22-05-2026	23-05-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Rajendra Nagar Line, Sub-district and District Satna. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Out of 8 serum samples collected and sent to NIRTH-ICMR Jabalpur, 7 samples tested positive for Measles (IgM ELISA). Cases were in the age group 8 months to 8 years. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MH/BUL/2026/21/843	Maharashtra	Buldhana	Acute Gastroenteritis	67	0	15-05-2026	18-05-2026	Under Surveillance	Cases of loose watery stools and vomiting were reported from Village Nageshwadi, Sub-District Mehkar, District Buldhana. District RRT investigated the outbreak. House to house survey was done. Probable cause of the outbreak was contaminated water from a well. Medicine and ORS packets were given to cases. 53 patients were treated at PHC Janefal. The affected

									age group was 14-72 years. Water sample from the well was tested at DPHL, Civil Hospital, Buldhana, by bacteriological examination and was found to be contaminated. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
MZ/AIZ/2026/21/844	Mizoram	Aizawl	Hepatitis A	26	0	22-05-2026	22-05-2026	Under Surveillance	Cases of nausea, abdominal pain, loss of appetite and yellow coloured urine were reported from Village Tanhril, Sub-District Tlangnuam, District Aizawl. District RRT investigated the outbreak. House to house survey was done. Cases were treated at UPHC Chawlhmun. The affected age group was 4-70 years. Out of 14 serum samples collected, 7 samples tested positive for Hepatitis A (IgM ELISA). Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
OR/JHA/2026/21/845	Odisha	Jharsuguda	Acute Diarrhoeal Disease	13	2	24-05-2026	24-05-2026	Under Surveillance	Cases of loose motion and vomiting were reported from Village Sunakhan, Sub-District Rengali, District Jharsuguda. District RRT investigated the outbreak. Cases developed symptoms after eating food in Sradha Bhoji at Village Nuadihi. Cases were treated at health facilities. 7 rectal swab samples collected showed growth of <i>E. coli</i>

									and <i>Staphylococcus species</i> by culture. 2 water samples collected, showed <i>E. coli</i> contamination indicating fecal contamination. The affected age group was 2-70 years. 2 deaths were reported in females aged 52 years and 65 years due to severe dehydration and shock. Health education was given regarding safe food habits and drinking water, hygiene and sanitation.
OR/SON/2026/21/846	Odisha	Sonepur	Acute Diarrhoeal Disease	11	0	20-05-2026	20-05-2026	Under Surveillance	Cases of loose watery stools were reported from Village Baraghatdadar, Sub-District Birmaharajpur, District Sonepur. District RRT investigated the outbreak. Cases were treated symptomatically. Cases were in the age group 6-54 years. 1 stool sample collected, tested negative for cholera by culture. Chlorine tablets were distributed to the households. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
OR/SUN/2026/21/847	Odisha	Sundargarh	Acute Gastroenteritis	86	2	23-05-2026	24-05-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Nuadihi, Sub-District Hemgir, District Sundargarh. District RRT investigated the outbreak. House to house survey was done. Cases were treated at a medical camp established in the locality and at CHC Hemgir. ORS packets were given to cases. The affected age group was 4-85 years. 9 stool samples collected, tested negative for cholera by culture. 2 deaths were reported: 55 years old male and 50 years old female due to

									severe dehydration. Chlorine tablets were distributed to the households. Community awareness and health education was given by the peripheral team on safe drinking water hygiene and sanitation.
TN/THE/2026/21/848	Tamil Nadu	Theni	Acute Diarrhoeal Disease	23	0	16-05-2026	18-05-2026	Under Surveillance	Cases of loose motion were reported from Cumbum Municipality area, Sub-District Uthamapalayam, District Theni. District RRT investigated the outbreak. House to house survey was done. Anti-diarrhoeal medicines and ORS packets were given to cases. The affected age group was 10-85 years. 16 patients were treated at IPD. 7 stool samples collected, tested negative for cholera by culture. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
UP/FAR/2026/21/849	Uttar Pradesh	Farrukhabad	Measles	7	0	21-05-2026	21-05-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Azizal Pur, Sub-District and District Farrukhabad. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. The affected age group was 2-13 years. Out of 5 serum samples collected, 1 sample tested positive for Measles (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.

UP/KUS/2026/21/850	Uttar Pradesh	Kushi Nagar	Chickenpox	24	0	18-05-2026	22-05-2026	Under Surveillance	Cases of fever with rash were reported from Village Sirsiya Bujurg, Sub-District Padrauna, District Kushi Nagar. District RRT investigated the outbreak. Active search for fever cases was done. Cases were given symptomatic treatment. Cases were in the age group 5-12 years. 10 serum samples collected and sent to RMRC Gorakhpur, tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
WB/PAR/2026/21/851	West Bengal	24 Paraganas North	Suspected Food Poisoning	79	0	19-05-2026	19-05-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Fakirtakia, Sub-District Sandeshkhali - I, District 24 Paraganas North. District RRT investigated the outbreak. Approximately 3,000 people attended a funeral ceremony and consumed food distributed after the procession. A medical camp was organized in the affected area. Medicines were given to cases. The affected age group was 1-69 years. Out of 4 stool samples collected and sent to NICED, Kolkata, 1 sample tested positive for <i>V. cholerae</i> by culture. 3 water samples collected showed presence of present Coliform bacteria. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.

WB/ALI/2026/21/852	West Bengal	Alipurduar	Chickenpox	5	0	18-05-2026	18-05-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Purba Kathalbari, Sub-District Alipurduar - I, District Alipurduar. District RRT investigated the outbreak. Active search for fever cases was done. Symptomatic treatment was given to cases. The affected age group was 10-48 years. 4 serum samples collected, tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
WB/MUR/2026/21/853	West Bengal	Murshidabad	Measles	23	0	20-05-2026	22-05-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Pulinda, Sub-District Beldanga - I, District Murshidabad. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. The affected age group was 9 months to 7 years. Out of 11 serum samples collected, 8 samples tested positive for Measles (IgM ELISA). Vitamin A solution was given to cases. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.

DISEASE OUTBREAKS OF PREVIOUS WEEKS REPORTED LATE

Unique ID.	Name of State-UT	Name of District	Disease- Illness	No. of Cases	No. of Deaths	Date of Start Outbreak	Current Status	Comments- Action Taken
AR/PAP/2026/21/854	Arunachal Pradesh	Papum Pare	Suspected Food Poisoning	20	0	12-05-2026	Under Surveillance	Cases of abdominal discomfort and loose stools were reported from Village Nerist 24, Sub-District Naharlagun EAC, District Papum Pare. District RRT investigated the outbreak. The affected age group was 19-22 years. The cases developed symptoms after consuming fried rice. Stool culture at TRIHMS Microbiology identified E. coli and Enterococcus spp. The probable source was contaminated drinking water from an old RO filter, with inadequately cooked fried rice also considered a possible source. All cases recovered now. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
BH/GOP/2026/21/855	Bihar	Gopalganj	Fever with Rash	5	0	10-05-2026	Under Surveillance	Cases of fever with rash were reported from Village Bhit Bherwa, Sub-District Gopalganj, District Gopalganj. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. 5 serum samples collected and sent to AIIMS Patna, tested negative for Measles by IgM ELISA. Cases were in the age group 6-30 years. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.

KL/ERN/2026/21/856	Kerala	Ernakulam	West Nile Fever	1	0	14-05-2026	Under Surveillance	A case was reported from Division 28, Kunnumpuram, Kochi Corporation, Sub-District Kanayannur, District Ernakulam. District RRT investigated the outbreak. 8 suspected cases reported from different areas of LSGDs in the period from 11.03.26 to 26.04.26. A 58-year-old male developed the symptoms of fever, extreme tiredness and vomiting on 14.04.2026 and sought treatment at FHC Cheranallloor on 15.04.2026 before being referred to Aster Medcity due to worsening clinical condition. His blood sample tested positive for West Nile virus (IgM) at NIV Alleppey. He was also reported to be positive for <i>Acanthamoeba</i> at SPHL Thiruvananthapuram. His serum sample was sent to NIV Alleppey for the PRNT test, and it was positive for West Nile. The patient was discharged on 03.05.2026. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/ERN/2026/21/857	Kerala	Ernakulam	Hepatitis A	11	0	04-05-2026	Under Surveillance	Cases of nausea, abdominal pain, loss of appetite and yellow coloured urine were reported from Village Kunnathunad (CT), Sub-District Kunnathunad, District Ernakulam. District RRT investigated the outbreak. House to house survey was done. Cases were treated at FHC Kumarapuram. Probable source of the outbreak was contaminated well water. Cases were in the age group 30-45 years. 2 serum samples were collected for HAV IgM ELISA and tested at RPH Lab Ernakulam, and both samples tested positive. 3 water samples were tested at RPH lab. All samples tested positive for coliform. Superchlorination of wells was done in the affected area. Community awareness and health education was given by the peripheral

								team on safe drinking water, hygiene and sanitation.
KL/KOL/2026/21/858	Kerala	Kollam	Hepatitis A	38	0	02-03-2026	Under Surveillance	Cases of fever, nausea and dark-colored urine were reported from Village Mayyanad (CT), Sub-District Kollam, District Kollam. District RRT investigated the outbreak. The suspected source of infection was exposure associated with Santhosham Foods, a food preparation establishment serving the local and migrant labour population. On 22.02.2026, 9 migrant workers from West Bengal and Odisha were identified with jaundice and elevated serum bilirubin levels. 30 blood samples were tested for Hepatitis A by Anti-HAV IgM ELISA and 1 sample by HAV IgM card test at Holy Cross Hospital, KIMS Kollam Multispeciality hospital, MCH Trivandrum, Travancore Medical College, Kollam, KIMS Hospital, N S Hospital, District Hospital Kollam, CHC Mayyanadu(Card test), AGC Hospital. Additionally, 7 cases were epidemiologically linked to the outbreak. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
