■ 2022 ■ 2023 ■ 2024 ■ 2025 ■ 2026

Unique ID.	Name of State-UT	Name of District	Disease- Illness	No. of Cases	No. of Deaths	Date of Start of Outbreak	Date of Reporting	Current Status	Comments- Action Taken
AP/CHI/2026/23/900	Andhra Pradesh	Chittoor	Acute Gastroenteritis	30	0	01-06-2026	02-06-2026	Under Control	Cases of vomiting and abdominal discomfort were reported from Village Pathurnatham, Sub-District Baireddipalle, District Chittoor. District RRT investigated the outbreak. The affected age group was 1.5-60 years. > The outbreak is suspected to be associated with consumption of Rasna juice served during a village festival. 3 water samples collected by RWS from the affected area were found satisfactory for drinking purpose. ORS was distributed in the affected area. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
AS/DHU/2026/23/901	Assam	Dhubri	Measles	9	0	04-06-2026	04-06-2026	Under Surveillance	Cases of fever with rash were reported from Village Pasuarkhal Pt.II, Sub-District Bilasipara Pt, District Dhubri. District RRT investigated the outbreak. The affected age group was 11 months-15 years. 8 blood samples collected, tested positive for Measles (IgM ELISA). Outbreak Response Immunization (ORI) activity for the measles outbreak was conducted and children received MR vaccine. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.

AS/HAI/2026/23/902	Assam	Hailakandi	Fever with Rash	5	0	02-06-2026	02-06-2026	Under Surveillance	Cases of fever, cough, conjunctivitis, headache and maculopapular rashes all over the body were reported from Village Rangauti Pt I and Rangauti Pt II, Sub-District Hailakandi, District Hailakandi. District RRT investigated the outbreak. The affected age group was 2-10 years. House to house active search for detection of new cases was carried out. 5 serum and throat swab samples tested at the VRDL Microbiology Department at GMCH tested negative for Measles (IgM ELISA). Symptomatic treatment was given to the cases. ORS and Vitamin-A supplementation were given to cases. Community awareness and health education given by the peripheral team on spread of infection and isolation of cases hygiene and sanitation.
DL/NOR/2026/23/903	Delhi	North East	Meningococcal Meningitis	1	0	28-05-2026	02-06-2026	Under Surveillance	A 13-years-old male with symptoms of high grade fever, headache and altered sensorium was admitted to Holy Family Hospital on 22.05.2026. The patient was admitted to the emergency room and showed clinical improvement after 24 hours of treatment. Subsequently, he was shifted to an isolation room for further management. CSF meningitis multiplex panel was positive for <i>Neisseria Meningitidis</i> . The child was discharged in hemodynamically stable condition on 30.05.2026. Contacts of the patient were administered Rifampicin orally/Ceftriaxone intra venous as per recommendation. IPC was strengthened in the hospital. District RRT investigated the outbreak. House to house survey was done. Community awareness and health

									education was given by the peripheral team on vector control measures, hygiene and sanitation.
GJ/AHM/2026/23/904	Gujarat	Ahmadabad	Acute Diarrhoeal Disease	63	0	03-06-2026	04-06-2026	Under Surveillance	Cases were reported from Akansha Society Akanksha Apartment, Sola Cross Road, Ward: Gota, Zone: North West, Ahmedabad Municipal Corporation, District Ahmadabad. District RRT investigated the outbreak. Adults were mostly affected. Active house-to-house surveillance was conducted. 67 water samples were tested at Central Lab, Dudheshwar. Among them, 3 were unfit. Cases were treated at Thaltej CHC and other private hospitals. Mobile Medical Van was deployed for 24 hours round the clock and medical camps were set up. Chlorine tablets and ORS packets were distributed. Engineering issues were resolved. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
JH/EAS/2026/23/905	Jharkhand	East Singhbhum	Chickenpox	15	0	05-06-2026	05-06-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Tilabani, Sub-District Musabani, District East Singhbhum. District RRT investigated the outbreak. The most affected age group was 3-30 years. 5 serum samples collected and sent to DPHL East Singhbhum tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education given by the peripheral team on spread of infection and isolation of cases, hygiene and sanitation.
JH/EAS/2026/23/906	Jharkhand	East Singhbhum	Suspected Food Poisoning	74	0	03-06-2026	04-06-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Jamshedpur city, District East Singhbhum. District RRT investigated the outbreak.

									Cases developed symptoms 5-6 hours after eating food at a marriage ceremony. Both children and adults were affected. Cases were treated at health facilities. Water samples collected on 04.06.2026 were tested at MGM VRDL Laboratory, Jamshedpur, by water culture and showed the presence of <i>E. coli</i> and <i>Enterococcus faecalis</i> . Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
JH/EAS/2026/23/907	Jharkhand	East Singhbhum	Chickenpox	7	1	02-06-2026	03-06-2026	Under Surveillance	Cases of fever with rash were reported from Village Bargikocha, Sub-District Potka, District East Singhbhum. District RRT investigated the outbreak. The affected age group was 7-70 years. 3 blood samples collected tested positive for <i>Varicella zoster</i> virus by IgM ELISA. One death was reported in a 58 years-old male on 01-06-2026 with symptoms of fever with rash. Community awareness and health education given by the peripheral team on spread of infection and isolation of cases, hygiene and sanitation.
JH/EAS/2026/23/908	Jharkhand	East Singhbhum	Measles	7	0	01-06-2026	01-06-2026	Under Surveillance	Cases of fever with rash were reported from Namda Basti Urban Jamshedpur area, Sub-District Golmuri-Cum-Jugsalai, District East Singhbhum. District RRT investigated the outbreak. The affected age group was 10 months-44 years. Out of 7 blood samples tested at MGM VRDL Lab Jamshedpur, 3 samples tested positive for Measles (IgM ELISA). Community awareness and health education given by the peripheral team on spread of infection and isolation of cases, hygiene and sanitation.

KL/ERN/2026/23/909	Kerala	Ernakulam	Acute Gastroenteritis	66	0	04-06-2026	05-06-2026	Under Surveillance	Cases of vomiting, loose stools and fever were reported from Village Vengola (CT), Sub-District Kunnathunad, District Ernakulam. District RRT investigated the outbreak. House to house survey was done. The affected age group was 31-60 years. 1 stool sample was tested by culture at Government Medical College, Ernakulam, and was negative for <i>Vibrio cholerae</i> and <i>Shigella</i> spp. One death was reported in a 49-years-old male with severe dehydration on 02.06.26. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/ERN/2026/23/910	Kerala	Ernakulam	Dengue	20	0	01-06-2026	01-06-2026	Under Surveillance	Cases of fever with body pain and fatigue were reported from Village Thrikkakkara North, Sub-District Kanayannur, District Ernakulam. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at UPHC Kalamaserry. Cases were in the age group 11-62 years. Out of 3 serum samples collected and sent to RPH Lab Ernakulam, 2 samples tested positive for Dengue (IgM ELISA). Fogging was done in the affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/ERN/2026/23/911	Kerala	Ernakulam	Dengue	14	0	01-06-2026	01-06-2026	Under Surveillance	Cases of fever with body pain and fatigue were reported from Village Eloor, Sub-District Paravur, District Ernakulam. Cases were treated at FHC Eloor. Cases were in the age group 31-45 years. 3 blood samples collected and sent to RPH Lab Ernakulam, tested positive for Dengue (IgM ELISA). Fogging was done

									in the affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/KOT/2026/23/912	Kerala	Kottayam	Dengue	10	0	06-06-2026	06-06-2026	Under Surveillance	Cases of fever, myalgia, headache, retro-orbital pain, generalized body ache, weakness, and joint pain were reported from Village Kangazha, Sub-District Changanassery, District Kottayam. District RRT investigated the outbreak. Most cases were in the age group of 30-59 years. 10 serum samples collected tested positive for Dengue (NS1 antigen card test). Anti-larval activities and fogging was done in the affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/KOZ/2026/23/913	Kerala	Kozhikode	Hepatitis A	34	0	04-06-2026	04-06-2026	Under Surveillance	Cases of nausea, loss of appetite, yellow coloured urine, fatigue and fever were reported from Village Kunnamangalam (CT), Sub-District Kozhikode, District Kozhikode. District RRT investigated the outbreak. House to house survey was done. Cases were treated at PHC Peruvayal. The affected age group was 5-44 years. 8 blood samples collected, tested positive for Hepatitis A (IgM ELISA). Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.

KL/KOZ/2026/23/914	Kerala	Kozhikode	Dengue	95	0	04-06-2026	04-06-2026	Under Surveillance	Cases of fever with body pain were reported from Village Olavanna (CT) ward 13, Sub-District Kozhikode, District Kozhikode. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at CHC Olavanna. Both children and adults were affected. 29 blood samples were tested at RPHL Kozhikode by Dengue NS1 antigen ELISA, and all samples tested positive. Fogging was done in the affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/PAT/2026/23/915	Kerala	Pathanamthitta	Dengue	22	0	06-06-2026	06-06-2026	Under Surveillance	Cases of high-grade fever, sweating, myalgia, loss of appetite, fatigue, headache and vomiting were reported from Village Kodumon, Sub-District Adoor, District Pathanamthitta. District RRT investigated the outbreak. House to house fever survey was done. The area was identified as water-scarce, with widespread water storage practices and mosquito breeding in containers. Extensive rubber plantations with discarded coconut shells and other breeding habitats were also noted. Cases were treated at FHC Chandanappally. Cases were in the age group 14-78 years. 2 samples were confirmed positive for dengue by IgM ELISA, while 20 samples tested positive by rapid Dengue NS1 antigen test at MCH Konni, THQH Konni, and FHC Koodal. Source reduction activities were conducted twice

									weekly, resulting in a reduction of the Breteau Index from 15.5 to 4.4. Fogging was done. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
KL/PAT/2026/23/916	Kerala	Pathanamthitta	Dengue	22	0	06-06-2026	06-06-2026	Under Surveillance	Cases of fever with myalgia and fatigue were reported from Village Koodal, Sub-District Konni, District Pathanamthitta. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at PHC Koodal. The affected age group was 14-78 years. 22 blood samples collected from 04.05.26 to 15.06.26 tested positive for Dengue (Rapid NS1). Entomological indices revealed HI=21, CI=33, BI=27. Anti larval activities and fogging was done in the affected area. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
KL/THR/2026/23/917	Kerala	Thrissur	Chickenpox	12	0	04-06-2026	04-06-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Melur (ward 13), Sub-District Chalakkudy, District Thrissur. District RRT investigated the outbreak. Active search for fever cases was done. Symptomatic treatment was given to cases. Most of the cases were below 15 years of age. All cases were clinically diagnosed with Chickenpox. Community awareness and health education given by the peripheral team on spread of infection and isolation of cases, hygiene and sanitation.
KL/WAY/2026/23/918	Kerala	Wayanad	Suspected Food Poisoning	16	0	28-05-2026	02-06-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Edavaka, Sub-District

									Mananthavady, District Wayanad. District RRT investigated the outbreak. Cases developed symptoms after eating food at a religious gathering. Cases were treated symptomatically.
