District wise disease alerts-outbreaks reported in the 24th week 2026

24th Week Map

Unique ID.	Name of State-UT	Name of District	Disease- Illness	No. of Cases	No. of Deaths	Date of Start of Outbreak	Date of Reporting	Current Status	Comments- Action Taken
AS/BAR/2026/24/933	Assam	Barpeta	Japanese Encephalitis	1	1	09-06-2026	09-06-2026	Under Surveillance	A 60-year-old male presented with back pain and mild fever, followed by fever, mental irritability, and slurred speech, from Village Chinadi, Sarthebari Sub-District, Barpeta District. District RRT investigated the outbreak. A serum sample was collected and tested positive for Japanese Encephalitis by IgM ELISA at the Microbiology Department, GMCH. The patient died on 02.06.2026 in GMCH due to septic encephalopathy. Fogging, source reduction, and fever surveillance were conducted. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
AS/JOR/2026/24/934	Assam	Jorhat	Fever	10	0	10-06-2026	10-06-2026	Under Surveillance	Cases of fever were reported from Village Dhantula Goriapothar, Sub-District Teok, District Jorhat. District RRT investigated the outbreak. The affected age group was 4-70 years. House-to-house case search and fever surveillance were done. The patients are treated symptomatically by CHO and health workers of Kharghoria AAM. 10 blood samples were tested at SRL, Dept. of Microbiology, JMCH by Rapid Diagnostic Test (Malaria Ag) and no positive findings were reported. Community awareness and health education given by the

									peripheral team on vector control measures, hygiene and sanitation.
AS/KAM/2026/24/935	Assam	Kamrup Metro	Measles	11	0	11-06-2026	12-06-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Dhirenpara, Sundarbari and Fancy Bazar areas, Guwahati Municipal corporation, District Kamrup Metro. District RRT investigated the outbreak. Active search for fever cases was done. All cases were given symptomatic treatment. Cases were below 12 years of age. 7 serum samples collected and sent to IDSP-SRL GMCH, tested positive for Measles (IgM ELISA). Complete vaccination of affected individuals was noted during surveillance. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
BH/BHO/2026/24/936	Bihar	Bhojpur	Chickenpox	5	0	09-06-2026	10-06-2026	Under Surveillance	Cases of fever with rash were reported from Ward No. 12 of South Chandi, Village Chandi, Sub-District Koilwar, District Bhojpur. District RRT investigated the outbreak. The most affected age group was 1.6-12 years, and a 30-year-old adult. Essential dose of Vitamin A solution was given to the affected individuals. 5 blood samples received from PMCH were positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.

CT/BEM/2026/24/937	Chhattisgarh	Bemetara	Suspected Food Poisoning	21	0	10-06-2026	12-06-2026	Under Surveillance	Cases of nausea, loose motion and abdominal pain were reported from Village Bhilauni, Sub-District Nandghat, District Bemetara. District RRT investigated the outbreak. The affected age group was 2-35 years. Cases had consumed <i>panipuri</i> from Bhilauni Weekly Market. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
CT/SUR/2026/24/938	Chhattisgarh	Surguja	Hepatitis A & E	56	0	05-06-2026	08-06-2026	Under Surveillance	Cases of weakness, vomiting, and yellowing of the eyes were reported from Villages Narmadapur, Kuniya, Barima, Baigahwa and Kesra, Sub-District Mainpat, District Surguja. District RRT investigated the outbreak. Both children and adults were affected. Health officials conducted door-to-door screenings in the affected hamlets. 56 blood samples were tested at Medical college Ambikapur Lab for Hepatitis A and E by IgM ELISA, 4 found HAV and 3 found HEV positive. Chlorination of handpumps and local water supplies was done. Temporary health camps were established to provide free health screenings and distribute essential medicines. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
GJ/GAN/2026/24/939	Gujarat	Gandhinagar	Acute Diarrhoeal Disease	71	0	07-06-2026	08-06-2026	Under Surveillance	Cases of loose motions and vomiting were reported from Village Vavol Nadiya vas, Gandhi Nagar Corporation, District Gandhinagar.

									District RRT investigated the outbreak. House to house survey was done. Pipeline leakages were observed in the locality. A medical camp was established. Medicine, ORS packets and chlorine tablets were distributed to the households. Alternate supply of drinking water was arranged in the affected area. People were advised to use boiled water for drinking purpose. Both children and adults were affected. Pipeline leakages were repaired by PHED. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
JK/KUP/2026/24/940	Jammu and Kashmir	Kupwara	Chickenpox	10	0	10-06-2026	11-06-2026	Under Surveillance	Cases of fever with rash were reported from Village Nut Nusa, Sub-District Handwara, District Kupwara. District RRT investigated the outbreak. Cases were students of Govt. Middle School Chak Nutnusa. The affected age group was 5-13 years. 10 blood samples were collected and sent to DPHL Kupwara for testing. All 10 samples were found positive for <i>V. zoster</i> (IgM ELISA). All the affected patients were isolated at home. Treatment to all the affected patients was given by the RRT. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
JK/KUP/2026/24/941	Jammu and Kashmir	Kupwara	Chickenpox	5	0	09-06-2026	09-06-2026	Under Surveillance	Cases of fever with rash were reported from Village Kachri, Sub-District Langate, District Kupwara.

									District and Block RRT investigated the outbreak. The affected age group was 6-10 years. The cases were reported from Upper Primary School Kachri. 5 blood samples were collected and sent to DPHL Kupwara. All 5 samples tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
JK/SO/2026/24/942	Jammu and Kashmir	Shopian	Chickenpox	8	0	07-06-2026	08-06-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village and Sub-District Herman, District Shopian. District RRT investigated the outbreak. Active search for fever cases was done. Cases were students of Hamdan School. All cases were treated symptomatically. The affected age group was 7-11 years. 8 serum samples collected, tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
JH/EAS/2026/24/943	Jharkhand	East Singhbhum	Chickenpox	5	0	10-06-2026	10-06-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Jira Para, Sub-District Chakulia, District East Singhbhum. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Cases were in the age group 4-41 years. 3 serum samples collected, tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education was given by the peripheral team on

									isolation of cases, hygiene maintenance and proper nutrition.
JH/EAS/2026/24/944	Jharkhand	East Singhbhum	Chickenpox	8	1	09-06-2026	09-06-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Nayagram, Sub-District Chakulia, District East Singhbhum. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Cases were in the age group 9-65 years. 3 serum samples collected, tested positive for <i>V. zoster</i> (IgM ELISA). 1 death was reported in a 58-years-old male with symptoms of fever with rash and dehydration on 01.06.2026. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
JH/KHU/2026/24/945	Jharkhand	Khunti	Fever with Rash	10	0	10-06-2026	11-06-2026	Under Surveillance	Cases of fever with rash were reported from Village Patomgara, Sub-District Khunti, District Khunti. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Cases were in the age group 1-23 years. 8 serum samples collected tested negative for Measles (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.

JH/LOH/2026/24/946	Jharkhand	Lohardaga	Chickenpox	14	0	05-06-2026	08-06-2026	Under Surveillance	Cases of fever with rash were reported from Village Tisiya, Sub-District Kisko, District Lohardaga. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Cases were in the age group 1-33 years. Out of 10 serum samples collected and sent to RIMS Ranchi, 3 samples tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
KN/HAS/2026/24/947	Karnataka	Hassan	Acute Diarrhoeal Disease	13	0	11-06-2026	12-06-2026	Under Surveillance	Cases of loose watery stools were reported from Village Karekere, Sub-District and District Hassan. District RRT investigated the outbreak. Cases were students residing at Karekere Agricultural College hostel. Cases were treated at GH C.R.Patna. 6 students were treated at HIMS Hospital. DSO and surveillance team visited the area and health education was given. ORS was distributed. The students were told to drink boiled and have freshly prepared food. Cases were in the age group 19-20 years. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/ERN/2026/24/948	Kerala	Ernakulam	Dengue	18	0	10-06-2026	13-06-2026	Under Surveillance	Cases of fever with myalgia and fatigue were reported from Village 1D Raveendran Road, Sub-District Kanayannur, District Ernakulam. District RRT investigated the outbreak. House to

									house fever survey was done. Cases were treated at UPHC Kadavanthra. Cases were in the age group under 5-60 years. 1 serum sample collected and sent to RPH Lab Ernakulam, tested positive for Dengue (IgM ELISA). Source reduction activities and fogging was done in the affected area. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
KL/ERN/2026/24/949	Kerala	Ernakulam	Acute Gastroenteritis	20	0	08-06-2026	08-06-2026	Under Surveillance	Cases of loose motion and vomiting were reported from Division 1, 2, 3 and 4 of Kochi corporation, Sub-District Kochi, District Ernakulam. District RRT investigated the outbreak. House to house survey was done. The probable cause of the outbreak was pipeline leakage in the water supply system. Cases were treated at THQH Fort Kochi. The affected age group was 16-60 years. 3 water samples collected showed presence of coliform bacteria at RPH Lab, Ernakulam. Pipeline leakages were repaired by KWA. Chlorination of water sources was done. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.
KL/KOT/2026/24/950	Kerala	Kottayam	Dengue	20	0	05-06-2026	08-06-2026	Under Surveillance	Cases of fever with headache, myalgia and vomiting were reported from Village Chempu (Ward No. 8), Sub-District Vaikom, District Kottayam. District RRT investigated the outbreak. House to house fever

									survey was done. Cases were treated at FHC Brahmamangalam. Cases were in the age group 8-86 years. 19 cases were positive by Dengue NS1 Antigen Rapid Card Test and 1 case was confirmed by Dengue IgM ELISA from various health facilities. Fogging was done in the affected area. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
KL/KOZ/2026/24/951	Kerala	Kozhikode	Nipah Virus	1	0	11-06-2026	12-06-2026	Under Surveillance	A case was reported from Village Ramanattukara (CT), Sub-District Kozhikode, District Kozhikode. A 43-year-old male developed fever, loss of appetite, and fatigue on 01.06.2026. He initially sought treatment at Red Crescent Hospital, Feroke on 02.06.2026 and was re-admitted on 07.06.2026 with worsening fatigue, body pain, and altered sensorium. On 08.06.2026, he was transferred to Aster MIMS Hospital, Kozhikode, where he developed worsening sensorium requiring ICU admission and intubation on 09.06.2026. MRI brain showed multiple small T2/FLAIR hyperintense lesions. A TruNat Nipah PCR on a throat swab was weakly positive, following which the patient was shifted to a negative-pressure isolation room. Additional samples were collected, and RT-PCR confirmed Nipah virus infection on 10.06.2026. The patient was

									transferred to Government Medical College (GMC), Kozhikode on the same day. Confirmation by ICMR–National Institute of Virology (NIV), Pune, on 11.06.2026 showed Nipah virus positivity in the nasopharyngeal/throat swab (NPS/TS), cerebrospinal fluid (CSF), and urine by real-time RT-PCR. The patient received Ribavirin, Remdesivir, and two doses of monoclonal antibody therapy. Serial follow-up samples tested at ICMR–NIV, Pune, remained RT-PCR positive in NPS/TS until 24.06.2026, while urine samples became negative earlier. Follow-up samples collected on 27.06.2026, 04.07.2026, and 11.07.2026 were negative for Nipah virus by real-time RT-PCR. Additional follow-up samples tested at Regional VRDL, GMC Kozhikode, on 24.06.2026 and 29.06.2026 were also negative. As of 17.07.2026, the patient remained admitted in the T-ICU at GMC Kozhikode, was post-tracheostomy, and was clinically improving.
KL/KOZ/2026/24/952	Kerala	Kozhikode	Hepatitis A	27	0	12-06-2026	12-06-2026	Under Surveillance	Cases of anorexia, abdominal pain and dark coloured urine were reported from Village Olavanna, Sub-District Kozhikode, District Kozhikode. District RRT investigated the outbreak. House to house survey was done. Cases were treated at CHC Olavanna. The affected age group was 17-18 years. 2 serum samples collected, tested positive for Hepatitis A (IgM ELISA). 2 water samples

									collected showed the presence of <i>E.coli</i> . By culture. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/KOZ/2026/24/953	Kerala	Kozhikode	Shigellosis	4	1	08-06-2026	08-06-2026	Under Surveillance	Cases of fever with loose stools were reported from Village Thalakkulathur, Sub-District Kozhikode, District Kozhikode. District RRT investigated the outbreak. House to house survey was done. 4 stool samples were collected and tested by RT-PCR at the Department of Microbiology, Government Medical College, Kozhikode, and all 4 samples tested positive for <i>Shigella</i> species. In addition, a well water sample used for drinking purposes was tested at the Regional Analytical Laboratory, Malaparamba, Kozhikode, and was found to be positive for <i>Shigella</i> . A death was reported in a 4-year-old female child on 06.06.2026 in the PICU of IMCH, Kozhikode. The certified cause of death was refractory septic shock, <i>Shigella</i> encephalopathy, myocarditis, MODS, ARDS and severe left ventricular dysfunction secondary to <i>Shigella</i> infection. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.

KL/MAL/2026/24/954	Kerala	Malappuram	Acute Gastroenteritis	39	0	08-06-2026	10-06-2026	Under Surveillance	Cases were reported from Sub-District Nilambur, District Malappuram. District RRT investigated the outbreak. Cases developed symptoms after eating food at a housewarming function held on 07 June 2026. Approximately 450–500 individuals attended the event, of whom 39 subsequently developed symptoms consistent with acute gastroenteritis, including loose stools and abdominal pain. The affected individuals sought medical care at the Community Health Centre, Porur, and various local clinics. Most cases were managed symptomatically on an outpatient basis, and no severe complications or deaths were reported. The affected age group was 5-14 years. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/PAL/2026/24/955	Kerala	Palakkad	Dengue	10	0	13-06-2026	14-06-2026	Under Surveillance	Cases of fever with body pain and fatigue were reported from Village and Sub-District Attappadi (Ward 12), District Palakkad. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at CHC Agali. Cases were in the age group 6-72 years. 3 blood samples were collected for the Dengue NS1 ELISA test, of which 3 samples tested positive at Regional Public Health Lab. 41 blood samples were collected for Dengue Rapid NS1 card testing, of which 19 samples tested positive. Anti-larval activities and fogging was done. Community

									awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
KL/THI/2026/24/956	Kerala	Thiruvananthapuram	Suspected Food Poisoning	75	0	13-06-2026	14-06-2026	Under Surveillance	Cases of diarrhoea, vomiting and abdominal pain were reported from Village Venjaramoodu, Sub-District Nedumangad, District Thiruvananthapuram. District RRT investigated the outbreak. Cases fell ill after eating food from SGMC Thiruvananthapuram college canteen. Cases were treated at health facilities. The affected age group was 19-30 years. Out of 7 water samples collected, 2 samples tested positive for <i>E.coli</i> by culture. 2 stool samples collected showed growth of no entero-pathogens. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
KL/THR/2026/24/957	Kerala	Thrissur	Dengue	21	1	12-06-2026	13-06-2026	Under Surveillance	Cases of fever, headache, body pain, joint pain and generalized weakness were reported from Village Nattika, Sub-District Chavakkad, District Thrissur. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at FHC Nattika. Cases were in the age group 12-77 years. 17 blood samples tested positive for dengue by Rapid NS1 antigen test, and 4 blood samples tested positive for dengue by NS1 ELISA and IgM ELISA, from various facilities. 1 death was reported in a 66-years-old female who tested positive for Dengue (NS1 Ag ELISA) on 18.06.2026. The patient had fever,

									headache, body pain, joint pain, and generalized weakness and died on 17.06.2026. Anti-larval activities and fogging was done. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
KL/THR/2026/24/958	Kerala	Thrissur	West Nile Fever	1	0	08-06-2026	10-06-2026	Under Surveillance	Case was reported from Village Machingal house, Sub-District Thrissur, District Thrissur. District RRT investigated the outbreak. A 6-year-old male child presented with fever, vomiting, headache, and signs of meningeal irritation and was admitted at Jubilee Mission Medical College Hospital, Thrissur on 26.05.26 where he was diagnosed with Acute Meningitis. Serum and CSF samples were collected on 03.06.26 and 04.06.26 respectively, were sent for viral panel study at ICMR-NIV Alappuzha and tested positive for West Nile virus (Serum IgM positive; CSF IgM negative). MRI Brain was normal and the child was discharged in stable condition on 05-06-2026 after treatment. A repeat serum sample was collected and sent to ICMR-NIV Alappuzha for Plaque Reduction Neutralization Test (PRNT) for confirmatory testing, and the result is awaited. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.

KL/THR/2026/24/959	Kerala	Thrissur	Acute Diarrhoeal Disease	83	0	08-06- 2026	10-06- 2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Mangad (Part), Sub-District Kunnamkulam, District Thrissur. District RRT investigated the outbreak. Cases fell ill after eating food served at a marriage ceremony. Cases were treated at health facilities. All cases recovered. Both children and adults were affected. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
KL/WAY/2026/24/960	Kerala	Wayanad	Acute Gastroenteriti s	693	0	06-06- 2026	08-06- 2026	Under Surveillance	Cases of loose motion, vomiting and fever were reported from Village Nenmeni, Sub-District Sulthanbathery, District Wayanad. District RRT investigated the outbreak. Cases developed symptoms after eating food prepared from the school mess. The school has a total student strength of 839 and 41 teaching staff. A total of 693 cases were treated at PHC Chulliode, FHC Cheeral, FHC Ambalavayal, THQH Sulthan Bathery and FHC Chethal. 19 cases were laboratory confirmed as Shigella sonnei. Of these, 16 stool samples were collected and initially cultured at MCH Mananthavady. The isolates were subsequently referred to MCH Kozhikode for confirmatory testing, and all 16 samples were confirmed positive. In addition, 2 stool samples collected from students admitted to MCH Kozhikode were confirmed positive, and 1 stool sample tested at a private laboratory was also confirmed positive. All

									cases recovered. The school uses borewell water for drinking and cooking purposes. Water samples from the borewell were tested on 29.05.2026 and found negative for coliform bacteria and E. coli. Superchlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe food habits and drinking water, hygiene and sanitation.
LA/LEH/2026/24/961	Ladakh	Leh Ladakh	Acute Gastroenteritis	29	0	08-06-2026	08-06-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Turtuk, Sub-District Nubra, District Leh. District RRT investigated the outbreak. Cases fell ill after eating food served at a marriage ceremony. Cases were treated at PHC Turtuk. All cases recovered. The affected age group was 3-70 years. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
MP/GUN/2026/24/962	Madhya Pradesh	Guna	Acute Diarrhoeal Disease	17	0	08-06-2026	08-06-2026	Under Surveillance	Cases of loose watery stools were reported from Village Bude balaji (Ward no 9), Sub-District and District Guna. District RRT investigated the outbreak. House to house survey was done. Cases were treated at DH Guna. Cases were in the age group 2-50 years. Chlorine tablets were distributed to the households. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.

MP/GWA/2026/24/963	Madhya Pradesh	Gwalior	Measles	6	0	09-06-2026	10-06-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Karhiya, Sub-District Bhitwar, District Gwalior. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. 4 serum samples collected, tested positive for Measles (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MP/SAT/2026/24/964	Madhya Pradesh	Satna	Measles	6	1	09-06-2026	10-06-2026	Under Surveillance	Cases of fever with rash were reported from Village Ajmain, Sub-District Maihar, District Satna. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. The affected age group was 1-6 years. 6 serum samples collected and sent to ICMR Lab Jabalpur, tested positive for Measles (IgM ELISA). Vitamin A solution was given to cases. 1 death was reported in a 3-year-old male child on 11.06.2026 who tested positive for measles. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MH/KOL/2026/24/965	Maharashtra	Kolhapur	Hepatitis A & E	23	0	10-06-2026	10-06-2026	Under Surveillance	Cases of nausea, abdominal pain, yellow coloured urine and loss of appetite were reported from Village Madilge Kh., Sub-District Bhudargad, District Kolhapur. District RRT investigated the outbreak. House to house survey was

									done. Cases were treated at PHC Madilage. The affected age group was 14-44 years. Out of 23 serum samples collected, 7 samples tested positive for Hepatitis A and 1 sample for Hepatitis E (IgM ELISA). Water samples collected were non-potable. Chlorine tablets and ORS packets were distributed to the households. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
MG/WES/2026/24/966	Meghalaya	West Jaintia Hills	Suspected Food Poisoning	44	0	09-06-2026	12-06-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Lakadong, Sub-District Laskein, District West Jaintia Hills. District RRT investigated the outbreak. Cases fell ill after eating food served at a funeral gathering at Raliang Village. Cases were treated at CHC Laskein. All cases recovered. The affected age group was 30-40 years. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
PB/PUN/2026/24/967	Punjab	Patiala	Hepatitis A & E	35	0	10-06-2026	11-06-2026	Under Surveillance	Cases of nausea, abdominal pain, yellow coloured urine and loss of appetite were reported from Sub-District Dogra Mohalla, District Patiala. District RRT investigated the outbreak. House to house survey was done. Cases were treated at health facilities. 5 patients were treated at IPD. The affected age group was 4–68 years. 18 blood serum and 35 water samples were collected. Serum samples were sent to the IDSP DPHL

									Laboratory, MKH, Patiala, and water samples were sent to the SPHL, Punjab, for testing. Of the serum samples, 16 tested positive for Hepatitis A and 1 for Hepatitis E by IgM ELISA. Of the water samples, 18 were found to be non-potable. Chlorine tablets and ORS packets were distributed to the households. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
TN/MAD/2026/24/968	Tamil Nadu	Madurai	Hepatitis A & E	25	0	05-06-2026	08-06-2026	Under Surveillance	Cases of nausea, abdominal pain and loss of appetite were reported from Tagore Nagar and Keela Kailasapuram, Madurai Corporation, Sub-District Madurai North, District Madurai. District RRT investigated the outbreak. House to house survey was done. Pipeline leakages were identified. Alternate supply of drinking water was arranged in the affected area. The affected age group was 4-20 years. Out of 7 serum samples collected and sent to DPHL Usilampatti, 3 samples tested positive for Hepatitis A & E (IgM ELISA). Out of 6 water samples collected, 3 samples showed presence of coliform bacteria. Chlorination of water sources was done. Pipeline leakages were repaired by PHED. Community awareness and health education was given by the peripheral team on safe

									drinking water and food habits, hygiene and sanitation.
TN/TEN/2026/24/969	Tamil Nadu	Tenkasi	Scrub Typhus	9	0	08-06-2026	09-06-2026	Under Surveillance	Cases of fever with body pain were reported from Village Kanakkupillaivalasai, Sub-District Shenkottai, District Tenkasi. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at PHC Periyapillaivalasi.
