(N=40)****Disease wise no of outbreaks reported under IDSP during 2022-2026 till 28th wk of Every Year**

Unique ID.	Name of State-UT	Name of District	Disease- Illness	No. of Cases	No. of Deaths	Date of Start of Outbreak	Date of Reporting	Current Status	Comments- Action Taken
AP/YSR/2026/28/1104	Andhra Pradesh	Y.S.R. Kadapa	Acute Gastroenteritis	23	0	08-07-2026	08-07-2026	Under Surveillance	Cases of loose motions and nausea were reported from Sub-District Kadapa, District Y.S.R. Kadapa. District RRT investigated the outbreak. The affected age group was 19-25 years. Cases were students residing at a hostel and had consumed dosa and chutney for dinner. All cases were treated symptomatically. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
AS/GOL/2026/28/1105	Assam	Golaghat	Japanese Encephalitis	1	1	08-07-2026	08-07-2026	Under Surveillance	A 61 year-old female case with symptoms of fever, seizure and headache was reported from Village Golaghat Grant, Sub-District and District Golaghat. District RRT investigated the outbreak. Her CSF sample was tested at Jorhat Medical College Hospital Lab and was positive for Japanese Encephalitis virus on 05/07/2026. The patient died on 10/07/2026. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
AS/NAL/2026/28/1106	Assam	Nalbari	Acute Diarrhoeal Disease	25	0	06-07-2026	08-07-2026	Under Surveillance	Cases were reported from Villages Barkhola and Bargacha (Bargarh), Sub-District Barbhag, District Nalbari. District RRT investigated the outbreak. Both children and adults were affected. The people were affected due to consumption of food at a religious gathering. 5 rectal swab samples and 2 water samples were tested at DPHL, Nalbari, and no positive results were reported in any sample. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.

CT/BAS/2026/28/1107	Chhattisgarh	Bastar	Hepatitis A	47	0	09-07-2026	10-07-2026	Under Surveillance	Cases of vomiting and yellow discoloration of eyes were reported from Village Negigudha, Sub-District Jagdalpur, District Bastar. District RRT investigated the outbreak. House to house survey was done. Cases were treated at CHC Titirgaon. Both children and adults were affected. Out of 6 serum samples collected and sent to LBKMG Medical College Dimrapal, Jagdalpur, 1 sample tested positive for Hepatitis A (IgM ELISA). Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
CT/JAS/2026/28/1108	Chhattisgarh	Jashpur	Suspected Typhoid	15	0	11-07-2026	12-07-2026	Under Surveillance	Cases of fever, abdominal pain and loss of appetite were reported from Village and PHC Lodam, Sub-District Jashpur, and District Jashpur. District RRT investigated the outbreak. Active case search was done. The affected age group was 11-38 years. 15 serum samples were tested by the Widal test. All 15 samples were positive for <i>Salmonella typhi</i> . Control measures, including ensuring safe drinking water and chlorination were initiated. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
CT/UTT/2026/28/1109	Chhattisgarh	Uttar Bastar Kanker	Japanese Encephalitis	1	1	06-07-2026	06-07-2026	Under Surveillance	A case was reported from Village Kodekurse, Sub-District Durgkonda, District Uttar Bastar Kanker. The case was a 1.5 year old female who was admitted to MCH Kanker on 1.07.2026 with chief complaints of fever, abnormal movement of all four limbs, dullness and lethargy. Blood and CSF samples tested for JE IgM ELISA at Medical College, Jagdalpur were positive on 04.07.2026. The patient died on 04.07.26. District RRT and block team

									investigated the outbreak. Active case search was conducted. Pig rearing was observed in the locality, with pig enclosures located approximately 50 m and 300 m from the patient's residence. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
GJ/AMR/2026/28/1110	Gujarat	Amreli	Fever	95	0	09-07-2026	09-07-2026	Under Control	Cases of fever were reported from Village Timbi, Sub-District Jafrabad, District Amreli. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at PHC Nageshree. Most of the cases were >15 years of age. All 80 blood samples collected, tested negative for malaria (Microscopy Peripheral Blood Smear) Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
GJ/BHA/2026/28/1111	Gujarat	Bharuch	Hepatitis E	73	0	05-07-2026	06-07-2026	Under Surveillance	Cases of fatigue, abdominal discomfort and dark coloured urine were reported from Village Galenda, Sub-District Vagra, District Bharuch. District RRT investigated the outbreak. House to house survey was done. Probable cause of the outbreak was leakages in the water supply pipeline. A medical camp was established in the affected area. Cases were treated. The affected age group was 15-70 years. 6 serum samples were collected and tested at DPHL Bharuch for Hepatitis A and Hepatitis E. 2 samples were positive for Hepatitis E (IgM ELISA). Pipeline leakages were repaired by the gram panchayat. Chlorine tablets were distributed to the households. People were advised to use boiled water for drinking purpose.

									Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
GJ/KHE/2026/28/1112	Gujarat	Kheda	Chandipura Virus	4	3	10-07-2026	12-07-2026	Under Surveillance	Cases with symptoms of acute encephalitis syndrome were reported from Village Shirani Muvad, Sub-District Kathlal, District Kheda. District RRT investigated the outbreak. House to house fever survey was done. Cases were in the age group 1-9 years. Cases were treated at GMERS Gandhinagar. Out of 7 serum samples collected till 20.08.2026 and sent to GBRC Gandhinagar, 4 samples tested positive for Chandipura virus by RT-PCR. 3 deaths were reported in children aged 2-9 years. Malathion 5% was dusted surrounding the houses and residual spraying with Alpha Cypermethrin was done in the affected area. Community awareness and health education was given by the peripheral team on vector control measures, personal protection, hygiene and sanitation.
GJ/MAH/2026/28/1113	Gujarat	Mahesana	Chandipura Virus	4	2	11-07-2026	12-07-2026	Under Surveillance	Cases with an acute febrile neurological illness were reported from Sub-Districts Vadnagar and Bechraji, District Mahesana. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated in the Pediatric Intensive Care Unit at GMERS Medical College & Hospital, Gandhinagar with continuous cardiorespiratory and neurological monitoring. The clinical presentation was suggestive of Acute Encephalitis Syndrome (AES). Cases were in the age group 7 months - 13 years. Out of 11 serum samples collected till 20.08.2026, 4 samples tested positive for Chandipura Virus by RT-PCR. 2 deaths were reported in a 5-years-old-

									male on 20.07.2026 and 4-years-old-female on 28.07.2026. Close contacts of the patients were identified and monitored for 14 days. Indoor Residual Spray with Alpha Cypermethrin was done. Community awareness and health education given by the peripheral team on CHPV, hygiene and sanitation.
HR/KAI/2026/28/1114	Haryana	Kaithal	Hepatitis A	40	1	09-07-2026	09-07-2026	Under Surveillance	Cases with symptoms of vomiting, loose motion, stomach pain, jaundice and fever were reported from Village Sajooma, Sub-District Kalayat, District Kaithal. District RRT investigated the outbreak. House to house survey was done. Cases were treated at health facilities. 280 blood samples were tested at SSH Lab, Kaithal. Of these, 40 samples tested positive for Hepatitis A (IgM ELISA). BT and OT tests were positive in 51 of 64 and 186 of 277 water samples, respectively. A death was reported in an 11 year-old female on 07.07.2026. The medical certification of cause of death recorded neurogenic shock as the immediate cause, cerebral herniation as the antecedent cause, and acute liver failure, acute kidney injury, and hepatic encephalopathy as other significant causes. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
HP/HAM/2026/28/1115	Himachal Pradesh	Hamirpur	Measles	7	0	04-07-2026	06-07-2026	Under Surveillance	Cases of fever with rash were reported from Village Anu Khurd, Sub-District Hamirpur, District Hamirpur. District RRT investigated the outbreak. Active surveillance was conducted. The affected age group was 5-32 years. 7 serum and plasma samples were collected and tested positive for Measles virus by Anti-Measles

									IgM ELISA from Dr. RPGMC, Kangra at Tanda. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
JH/DUM/2026/28/1116	Jharkhand	Dumka	Chickenpox	8	0	10-07-2026	11-07-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Darjee Mahalla, Sub-District Dumka, District Dumka. District RRT investigated the outbreak. Active search for fever cases was done. Cases were given symptomatic treatment. The affected age group was 4-40 years. Out of 4 blood samples collected and sent to RIMS Ranchi, 1 sample tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
JH/LAT/2026/28/1117	Jharkhand	Latehar	Suspected Typhoid	12	0	10-07-2026	10-07-2026	Under Surveillance	Cases of abdominal pain, fever and anorexia were reported from Village Barwadih (CT), Sub-District Barwadih, District Latehar. District RRT investigated the outbreak. House to house survey was done. Cases were treated at Gandhiji Health Care Home. All cases recovered. Out of 32 blood samples collected, 12 samples tested positive for <i>S. typhi</i> by widal test. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
JH/LOH/2026/28/1118	Jharkhand	Lohardaga	Chickenpox	5	0	06-07-2026	12-07-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Kutmu, Sub-District Lohardaga, District Lohardaga. District RRT investigated the outbreak. Active search for fever cases was done. All cases were treated symptomatically. The affected age group was 11-32 years. 4 serum

									samples collected and sent to RIMS Ranchi, tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health WAS education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
KN/DAV/2026/28/1119	Karnataka	Davangere	Chikungunya and Dengue	68	0	04-07-2026	09-07-2026	Under Surveillance	Cases of fever with body pain were reported from Village Halivana, Sub-District Harihar, District Davangere. District RRT investigated the outbreak. House to house survey was done. Both children and adults were affected. 19 blood samples were collected and tested at DPHL, Davangere. 2 samples tested positive for Chikungunya (IgM ELISA), 1 sample positive for Dengue (IgM ELISA). Source reduction activities were carried out in the affected area. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
KN/DHA/2026/28/1120	Karnataka	Dharwad	Dengue	35	0	07-07-2026	08-07-2026	Under Surveillance	Cases of fever were reported from Village Hallikeri, Sub-District Annigeri, District Dharwad. District RRT investigated the outbreak. Both children and adults were affected. Active fever surveillance and larval surveys were conducted throughout the village. 3 blood samples were collected and tested at DPHL, Gadag. 3 samples were tested positive for Dengue (IgM ELISA). Fogging was carried out. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/IDU/2026/28/1121	Kerala	Idukki	Dengue	17	0	03-07-2026	07-07-2026	Under Surveillance	Cases of fever with body pain were reported from Village Rajakumari, Sub-District Udumbanchola, District Idukki. District RRT investigated the outbreak. House to house fever survey was done. Cases were

									treated at FHC Rajakumari. Out of 12 serum samples collected, 10 samples tested positive for Dengue (IgM ELISA). Cases were in the age group 17-79 years. Source reduction, indoor space spraying (ISS), fogging, vector surveillance, and IEC activities were done. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/KOZ/2026/28/1122	Kerala	Kozhikode	Dengue	44	0	08-07-2026	08-07-2026	Under Surveillance	Cases of fever with myalgia and body pain were reported from Village Nellikode, Sub-District and District Kozhikode. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at UPHC Ponnankode. Cases of all age groups were affected. 32 samples collected, tested positive for Dengue NS1 antigen by rapid card test. Vector surveillance was conducted on 22/06/2026 covered 18 houses and recorded an HI of 11.11%, CI of 12.5%, and BI of 16.66. Mosquito breeding sites were treated with temephos. Anti-larval activities and fogging was done. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
KL/THR/2026/28/1123	Kerala	Thrissur	West Nile Fever	1	0	03-07-2026	06-07-2026	Under Surveillance	A case was reported from Village Vadakkumuri, FHC Thriprayar, District Thrissur. District RRT investigated the outbreak. The patient was a 62-year-old female who developed fever and headache on 24-06-2026, followed by vomiting and was admitted to Amala Hospital, Thrissur

									on 26-06-2026. CSF collected on 03-07-2026 tested positive for JE-WN IgM ELISA (presumptive positive), and PRNT confirmation awaited. The patient gradually improved clinically and was discharged on 05-08-2026 in stable condition. No epidemiologically linked cases have been reported from the locality. Field investigation revealed mosquito breeding with HI 20%, BI 28, CI 28%. House-to-house surveillance, fever surveillance, health education, source reduction, and vector control measures were carried out in the affected area. The patient is under treatment Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
MP/CHH/2026/28/1124	Madhya Pradesh	Chhindwara	Acute Diarrhoeal Disease	59	0	06-07-2026	10-07-2026	Under Surveillance	Cases of vomiting and loose stools were reported from Village Pipariya Khurd, PHC Khamara, District Chhindwara. District RRT investigated the outbreak. House to house survey was done. The probable source of the outbreak was contaminated well water. Medicine and ORS packets were given to cases. Superchlorination of well water was done. Both children and adults were affected. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
MP/GWA/2026/28/1125	Madhya Pradesh	Gwalior	Rubella	5	0	07-07-2026	07-07-2026	Under Surveillance	Cases of fever with rash were reported from Village Manikpur colony (ward no.12), Sub-District Pichhore Or Dabra, District Gwalior. District RRT investigated the outbreak. Active search for fever cases was

									done. Cases were treated symptomatically. Out of 5 serum samples collected, 1 sample tested positive for Rubella (IgM ELISA). Cases were in the age group 4-13 years. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MH/AMR/2026/28/1126	Maharashtra	Amravati	Acute Gastroenteritis	24	0	11-07-2026	11-07-2026	Under Surveillance	Cases of abdominal pain and loose motions were reported from Village Rithpur, Sub-District Morshi, District Amravati. District RRT investigated the outbreak. House to house survey was done. Cases fell ill after food at a community gathering. Cases were treated at CHC Khed. Both children and adults were affected. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
MH/JAL/2026/28/1127	Maharashtra	Jalna	Measles	6	1	03-07-2026	09-07-2026	Under Surveillance	Cases of fever, rash and cough were reported from Village Usmanpeth, Sub-District Bhokardan, District Jalna. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. The affected age group was 1-8 years. Out of 6 serum samples collected, 4 samples tested positive for Measles (IgM ELISA). 1 death was reported in a 1-year-old-male child admitted at PICU on 03.07.2026. The deceased was positive for Measles. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.

MH/NAG/2026/28/1128	Maharashtra	Nagpur	Acute Diarrhoeal Disease	25	0	08-07-2026	08-07-2026	Under Surveillance	Cases of abdominal pain, vomiting and loose motion were reported from Village Savitribai Fule Nagar, Sub-District Nagpur (Urban), District Nagpur. District RRT investigated the outbreak. House to house survey was done. Cases developed symptoms after consuming food at an engagement ceremony. Cases were treated at UPHC NGMC Somwari. The affected age group was 2-55 years. Community awareness and health education given by the peripheral team on safe food habits, hygiene and sanitation.
MG/EAS/2026/28/1129	Meghalaya	East Khasi Hills	Fever with Rash	7	0	06-07-2026	06-07-2026	Under Surveillance	Cases of fever with rash were reported from Village Tynring Lumpyngngad, Sub-District Mawryngkneng, District East Khasi Hills. District RRT investigated the outbreak. The affected age group was 6 months-5 years. 1 urine sample and 1 serum sample were collected from a suspected case and forwarded to the WHO National Polio Surveillance Project (NPSP) laboratory for Measles-Rubella IgM ELISA testing. The laboratory result was negative for Measles-Rubella (MR). Community awareness and health education given by the peripheral team on isolation of cases and immunization, hygiene and sanitation.
MG/EAS/2026/28/1130	Meghalaya	Eastern West Khasi Hills	Suspected Food Poisoning	6	1	07-07-2026	07-07-2026	Under Surveillance	Cases of fever, abdominal cramps, vomiting and diarrhoea were reported from Village Pydengdombah, Sub-District Mairang, District Eastern West Khasi Hills. District RRT investigated the outbreak. The affected age group was 4-29 years. A house-to-house case search was conducted. The outbreak was linked to the consumption of mushroom. A death was reported in a 4 year-old male due to severe dehydration. Community awareness and

									health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
MG/WES/2026/28/1131	Meghalaya	West Garo Hills	Scrub Typhus	36	0	06-07-2026	06-07-2026	Under Surveillance	Cases were reported from Villages Selbalgre, Anogre, Digranggre, Chibra Agal and Muriapal, Sub-District Rongram, District West Garo Hills. District RRT investigated the outbreak. The affected age group was 5–14 years. Active surveillance was strengthened for early detection and management of additional cases. 29 blood serum samples were collected for testing using Rapid Diagnostic Kit (RDK) and 11 for Chemiluminescence Immunoassay (CLIA). 11 samples were sent to DPHL, Tura Civil Hospital, for CLIA testing. 7 cases were positive by CLIA, while 29 cases were positive for Scrub Typhus by RDK. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
OR/KAL/2026/28/1132	Odisha	Kalahandi	Acute Gastroenteritis	30	0	10-07-2026	10-07-2026	Under Control	Cases of loose motion, vomiting and abdominal pain were reported from Village Chulsar, Sub-District Sadar, District Kalahandi. District RRT investigated the outbreak. Cases fell ill after consuming food at a community feast. Cases were treated at PHC Chandaka. All cases recovered. Mostly, adults were affected. Community awareness and health education given by the peripheral team on safe food habits, hygiene and sanitation.
OR/KHO/2026/28/1133	Odisha	Khordha	Hepatitis A	12	0	06-07-2026	06-07-2026	Under Surveillance	Cases of loss of appetite, abdominal pain and fever were reported from Village Sijua, Sub-District Bhubaneswar (M.Corp.), District Khordha. District RRT investigated the outbreak. House to house fever survey was done. Cases belonged to AIIMS

									residential campus (C, D, and F). Cases were treated. 5 serum samples collected tested positive for Hepatitis A (IgM ELISA). Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
RJ/DHO/2026/28/1134	Rajasthan	Dholpur	Acute Gastroenteritis	11	0	10-07-2026	12-07-2026	Under Control	Cases of loose motion, vomiting and abdominal pain were reported from Village and Sub-district Bareh, District Dholpur. District RRT investigated the outbreak. House to house survey was done. Cases fell ill after eating leftover food. Cases were treated at DH Dholpur on 10.07.2026. All cases recovered. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
TN/TIR/2026/28/1135	Tamil Nadu	Tiruchirappalli	Dengue	12	0	08-07-2026	09-07-2026	Under Surveillance	Cases of fever, headache, and body pain were reported from Village Valavanthakottai, Sub-District Thiruverumbur, District Tiruchirappalli. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at MGM GH Medical College Hospital and Child Jesus Hospital Trichy. All cases recovered. Both children and adults were affected.. Out of 6 serum samples collected, 3 samples tested positive for Dengue (IgM ELISA). Anti-larval activities and fogging was done in the affected area. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
TN/TIR/2026/28/1136	Tamil Nadu	Tiruppur	Fever	13	0	10-07-2026	10-07-2026	Under Surveillance	Cases of fever with body pain were reported from Village Pushpa Nagar, District Tiruppur. District RRT investigated the

									outbreak. House to house fever survey was done. Cases were treated at UPHC PRMH. Cases were in the age group 17-31 years. 13 serum samples collected and sent to TMCH tested negative for Dengue, Malaria, Typhoid and Scrub Typhus by IgM ELISA). Anti-larval activities were done in the affected area. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
UP/BUD/2026/28/1137	Uttar Pradesh	Budaun	Human Rabies	1	1	07-07-2026	09-07-2026	Under Control	Case was reported from Village Sakhua, Sub-District Bisauli, District Budaun.
