Disease wise no of outbreaks reported under IDSP during 2022-2026 till
31st wk of Every Year

Unique ID.	Name of State-UT	Name of District	Disease- Illness	No. of Cases	No. of Deaths	Date of Start of Outbreak	Date of Reporting	Current Status	Comments- Action Taken
AP/ANA/2026/31/1244	Andhra Pradesh	Anakapalli	Acute Diarrhoeal Disease	30	0	25-07-2026	29-07-2026	Under Surveillance	Cases of loose stools were reported from Village Kotauratla, Sub-District Kotauratla, District Anakapalli. District RRT investigated the outbreak. The cases were from KGBV Hostel, Kotauratla. The affected age group was 11-15 years. A medical camp was established at the hostel. Appropriate treatment, including ORS, zinc supplementation was given. Chlorination of water sources was done. Overhead tanks were cleaned. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
AP/TIR/2026/31/1245	Andhra Pradesh	Tirupati	Acute Gastroenteritis	20	0	28-07-2026	01-08-2026	Under Surveillance	Cases of dehydration, loose stools and vomiting were reported from Tirupati (Urban) District Tirupati. District RRT investigated the outbreak. The affected age group was 19-26 years. Cases were from S.V. Ayurvedic College and SVIMS Hostel, Tirupati. Faecally contaminated drinking water (by <i>E. coli</i>), external food deliveries and unhygienic practices were the probable causes of the outbreak. Medicine and ORS packets were given to cases. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
AS/KAM/2026/31/1246	Assam	Kamrup	Acute Diarrhoeal	51	0	28-07-2026	31-07-2026	Under Surveillance	Cases of loose watery stool, fever and vomiting were reported from Villages Barni and Soniadi, Sub-District Hajo,

			Disease						District Kamrup. District RRT investigated the outbreak. The affected age group was 2-55 years. The cases had consumed channa mixture from a local vendor. 5 rectal swabs and 2 water samples were tested at DPHL Kamrup. Rectal swab samples were tested by stool culture after 48–72 hours of incubation, and showed normal gut flora. Water samples were tested by MPN, and showed the presence of coliform bacteria, indicating that the water was unsatisfactory for potable use. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
AS/SRI/2026/31/1247	Assam	Sribhumi	Fever with Rash	6	0	29-07-2026	29-07-2026	Under Surveillance	Cases of fever with rash were reported from Village Mahakal, Sub-District Badarpur, District Sribhumi. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. The affected age group was below 15 years of age. 6 blood (serum) samples were tested at SRL, GMCH and showed no positive findings (IgM ELISA). The affected individuals were partially vaccinated. Community awareness and health education given by the peripheral team on isolation of cases and vaccination, hygiene and sanitation.
BR/GOP/2026/31/1248	Bihar	Gopalganj	Suspected Typhoid	20	0	01-08-2026	01-08-2026	Under Surveillance	Cases were reported from Villages UchkaGaon, Dahi Bhatta, Barhmani and Gurmha, Sub-District UchkaGaon,

									District Gopalganj. District RRT investigated the outbreak. House to house survey was done. Cases were treated. 20 blood samples were tested at CHC Uchkagaun Lab. 10 samples tested positive for <i>Salmonella typhi</i> by Widal test. Chlorine tablets were distributed to the households. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
CG/JAS/2026/31/1249	Chhattisgarh	Jashpur	Malaria	47	0	28-07-2026	28-07-2026	Under Control	Cases of fever with bodyache were reported from Village Chichili, Sub-District Sanna, District Jashpur. District RRT investigated the outbreak. Both children and adults were affected. Active case investigation and fever surveillance was initiated in the affected locality. Out of 47 blood samples collected, 1 sample tested positive for <i>P. falciparum</i> (Rapid Diagnostic Test (Malaria Ag)). Long-Lasting Insecticidal Nets were distributed. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
CG/RAI/2026/31/1250	Chhattisgarh	Raipur	Suspected Typhoid	22	0	29-07-2026	31-07-2026	Under Surveillance	Cases of fever with abdominal discomfort were reported from Village Purena and Kachana, Sub-District and District Raipur. District RRT investigated the outbreak. The affected age group was 5-47 years. 22 serum samples were tested by Widal, Typhidot/ rapid card tests, of which 16 tested positive for <i>Salmonella typhi</i> by widal test. 3 water samples were sent to DPHL Raipur, all found to be

									contaminated. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
CG/UBK/2026/31/1251	Chhattisgarh	Uttar Bastar Kanker	Malaria	14	0	24-07-2026	30-07-2026	Under Surveillance	Cases of fever with bodyache were reported from Village Charama, Sub-District Charama, District Uttar Bastar Kanker. District RRT investigated the outbreak. Both children and adults were affected. Rapid fever survey and active case search were done. 512 blood samples were collected and tested for malaria by microscopy at all PHCs, CHCs, and DHs and by RDT at all SHCs. Of these, 14 tested positive for malaria. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
CG/UBK/2026/31/1252	Chhattisgarh	Uttar Bastar Kanker	Malaria	45	0	28-07-2026	30-07-2026	Under Surveillance	Cases of fever with chills were reported from Village Marrampani, Sub-District Narharpur, District Uttar Bastar Kanker. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at PHC Narharpur. Cases of all age groups were affected. All 45 blood samples collected, tested positive for malaria - <i>P. faciparum</i> - 41 and <i>P. vivax</i> - 4 by (Microscopy Peripheral Blood Smear). Fogging and distribution of LLN nets was done. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.

GJ/GAN/2026/31/1253	Gujarat	Gandhinagar	Chandipura Virus	1	1	25-07-2026	27-07-2026	Under Surveillance	A 7 year-old-female with symptoms of fever, vomiting and convulsions was reported from Village Sonipur, Sub-District Gandhinagar, District Gandhinagar. District RRT investigated the outbreak. Her CSF sample tested positive for Chandipura virus (RT-PCR) on 06.08.2026 at GBRC Gandhinagar. The patient died on 10.08.2026. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
JK/KUP/2026/31/1254	Jammu and Kashmir	Kupwara	Chickenpox	8	0	31-07-2026	31-07-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Shirhama Qalam Abad (Kalam Chakla), Sub-District Langate, District Kupwara. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Cases were in the age group 1-16 years. Out of 8 blood samples collected and sent to DPHL Kupwara, 5 samples tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
JH/EAS/2026/31/1255	Jharkhand	East Singhbhum	Chickenpox	40	0	01-08-2026	01-08-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Village Andharjhor, Sub-District Boram, District East Singhbhum. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Cases

									were in the age group 1-31 years. 3 serum samples collected, tested positive for <i>V. zoster</i> (IgM ELISA). Cases were clinically diagnosed with chickenpox. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
JH/KHU/2026/31/1256	Jharkhand	Khunti	Malaria	10	0	27-07-2026	27-07-2026	Under Surveillance	Cases of fever with chills were reported from Village Bhut, Sub-District and District Khunti. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at PHC Maranghada. Anti-malarial medicines were given to cases. Cases were in the age group 11-48 years. Out of 10 blood samples collected, 2 samples tested positive for <i>P. falciparum</i> by RDT (Malaria Ag). Fogging was done in the affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
JH/KHU/2026/31/1257	Jharkhand	Khunti	Malaria	14	0	27-07-2026	27-07-2026	Under Surveillance	Cases of fever with chills and rigor were reported from Village Raniya, Sub-District Rania, District Khunti. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at PHC Rania. Anti-malarial medicines were given to cases. Cases were in the age group 6-52 years. Out of 14 blood samples collected, 5 samples tested positive for <i>P. falciparum</i> by RDT (Malaria Ag). Fogging was done in the

									affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KA/BEL/2026/31/1258	Karnataka	Belagavi	Suspected Food Poisoning	29	0	30-07-2026	31-07-2026	Under Surveillance	Cases of vomiting, nausea, abdominal pain and loose stool were reported from Village Salapur, Sub-District Ramdurg, District Belagavi. District RRT investigated the outbreak. Cases fell ill after eating food served at BCM Hostel, Salapur. Cases were treated at CHC Hosakote.
