Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
BR/PAS/2026/32/1293	Bihar	Pashchim Champaran	Measles	6	0	01-08-2026	03-08-2026	Under Surveillance	Cases of fever with rash were reported from Village Gokhula, Sub-District Narkatiaganj, District Pashchim Champaran. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. The affected age group was 5-27 years. 4 blood samples collected, tested negative for Measles (IgM ELISA). Community awareness and health education given by the peripheral team on isolation of cases and vaccination, hygiene and sanitation.
CG/BIL/2026/32/1294	Chhattisgarh	Bilaspur	Measles	8	0	03-08-2026	05-08-2026	Under Surveillance	Cases of fever with rash were reported from Village Lutara, Sub-District Seepat, District Bilaspur. District RRT investigated the outbreak. The affected age group was 1-13 years. 5 blood samples collected, tested positive for Measles (IgM ELISA). All cases were provided symptom-based management along with prophylactic Vitamin A doses. Mop-up vaccination was conducted. Community awareness and health education given by the peripheral team on isolation of cases and vaccination, hygiene and sanitation.

CG/SUK/2026/32/1295	Chhattisgarh	Sukma	Measles	8	0	06-08-2026	06-08-2026	Under Surveillance	Cases of fever with rash were reported from Village Budadi, Sub-District Sukma, District Sukma. District RRT investigated the outbreak. The affected age group was 6-10 years. 8 blood samples collected and sent to IPM Hyderabad, tested positive for Measles (IgM ELISA). Medicines and vitamin A solution were provided in the affected area by the medical team. Community awareness and health education given by the peripheral team on isolation of cases and vaccination, hygiene and sanitation.
GJ/AHM/2026/32/1296	Gujarat	Ahmedabad	Acute Gastroenteritis	18	0	05-08-2026	06-08-2026	Under Control	Cases of abdominal discomfort, loose stools, vomiting and mild abdominal pain were reported from Village Pirana, Sub-District Daskroi, District Ahmedabad. District RRT investigated the outbreak. The affected age group was 31-75 years. 2 stool samples, 2 vomitus samples were collected, showed no positive findings. Eight health teams were deployed to provide on-site outpatient services and conduct active case surveillance. A 108 Emergency Ambulance remained on standby. All cases were treated at the site. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
GJ/SUR/2026/32/1297	Gujarat	Surendranagar	Acute Diarrhoeal Disease	96	0	05-08-2026	05-08-2026	Under Surveillance	Cases of loose motion were reported from Village Dhrangadhra, Sub-District Dhrangadhra, District Surendranagar. District RRT investigated the outbreak. Both children and adults were affected. 6 water samples were tested by the

									Multiple Tube Technique and bacteriological examination at M.G. Hospital and WASMO. Of these, 1 sample was found unsatisfactory for drinking purpose. House to House surveillance, chlorine tablet distribution and chlorination were done. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
GJ/VAL/2026/32/1298	Gujarat	Valsad	Suspected Typhoid	10	0	05-08-2026	06-08-2026	Under Surveillance	Cases were reported from Village Chhiri (CT), Chharwada, Vapi and Kocharva, Sub-District Vapi, District Valsad. District RRT investigated the outbreak. The affected age group was 7-35 years. 10 serum samples were tested at PHC Chhirri Lab and were positive for Salmonella typhi by the Widal test. 2 water samples were tested by culture at the Microbiology Department, GMERS Valsad. E. coli was not detected; however, the samples showed evidence of recent faecal contamination. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
HR/AMB/2026/32/1299	Haryana	Ambala	Hepatitis A	81	0	07-08-2026	07-08-2026	Under Surveillance	Cases of fever, abdominal discomfort and dark coloured urine were reported from Village Kashyap Mohalla, Shahzadpur, Sub-District Ambala, District Ambala. District RRT investigated the outbreak. The affected age group was 7-15 years. 141 blood samples were tested for Hepatitis A and E, scrub typhus and malaria. Of these, 16 tested positive for Hepatitis A (IgM

									ELISA). 398 water samples were tested by OT, out of which 60 showed no chlorine. 60 water samples were assessed by bacteriological tests, of which 1 was found to be unfit. All tests were conducted at DIPHL, Civil Hospital, Ambala Cantt. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
HR/SIR/2026/32/1300	Haryana	Sirsa	Hepatitis A & E	95	0	04-08-2026	05-08-2026	Under Surveillance	Cases of fever, abdominal discomfort and dark coloured urine were reported from Village Desujodha, Sub-District Dabwali, District Sirsa. District RRT investigated the outbreak. Both children and adults were affected. 401 blood samples were tested for Hepatitis A and E by IgM ELISA. 58 tested positive for Hepatitis A and 37 for Hepatitis E. 58 water samples were tested at DPHL Sirsa 30 samples were unfit for drinking purpose. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
JK/ANA/2026/32/1301	Jammu and Kashmir	Anantnag	Chickenpox	12	0	03-08-2026	07-08-2026	Under Surveillance	Cases of fever with rash were reported from Village Adlash Magam, Sub-District Srigufwara, District Anantnag. District RRT investigated the outbreak. The affected age group was 5-14 years. The affected cases were from Public English Medium School Adlash Magam. 5 blood samples collected, tested positive for V. zoster (IgM ELISA). Community awareness and health education given by the peripheral team on isolation of cases, hygiene and sanitation.

JK/BAN/2026/32/1302	Jammu and Kashmir	Bandipora	Acute Diarrhoeal Disease	10	0	03-08-2026	03-08-2026	Under Surveillance	Cases of loose motion were reported from Village Asham, Sub-District Sonawari, District Bandipora. District RRT investigated the outbreak. The affected age group was 8-72 years. 5 water samples were collected and tested at DPHL Bandipora. 4 reported to be unsatisfactory. 1 stool sample was tested at SKIMS Soura and showed no positive findings on culture. ORS and chlorine tablets were distributed. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
JK/SRI/2026/32/1303	Jammu and Kashmir	Srinagar	Chickenpox	8	0	03-08-2026	03-08-2026	Under Surveillance	Cases of fever with rash were reported from Village Lone Mohalla, Sub-District Channapora, District Srinagar. District RRT investigated the outbreak. The affected age group was 9-15 years. 3 blood samples were sent to DPHL JLN in which 2 tested positive for Varicella zoster (IgM ELISA). Community awareness and health education given by the peripheral team on isolation of cases, hygiene and sanitation.
JH/DUM/2026/32/1304	Jharkhand	Dumka	Fever with Rash	6	0	03-08-2026	04-08-2026	Under Surveillance	Cases of fever with rash were reported from Village Banbari, Sub-District Ranishwar, District Dumka. District RRT investigated the outbreak. The affected age group was 6-60 years. 2 blood samples were tested at DPHL Dumka for confirmation of measles and were negative (IgM ELISA). Vitamin A solution was given to all the cases. Community awareness and health education given by the peripheral team

									on isolation of cases and vaccination, hygiene and sanitation.
JH/LAT/2026/32/1305	Jharkhand	Latehar	Suspected Typhoid	15	0	03-08-2026	03-08-2026	Under Surveillance	Cases of fever and abdominal discomfort were reported from Village and Sub-District Latehar, District Latehar. District RRT investigated the outbreak. Both children and adults were affected. 15 blood samples were collected, 8 samples tested positive for Salmonella typhi by the Widal test. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
JH/PAL/2026/32/1306	Jharkhand	Palamu	Measles	6	0	05-08-2026	05-08-2026	Under Surveillance	Cases of fever with maculo-papular rash were reported from Village Banjari, Sub-District Chainpur, District Palamu. District RRT investigated the outbreak. The affected age group was 2-6 years. Fever survey and active case search was done. 5 blood samples collected, tested positive for Measles (IgM ELISA). MR vaccination was done. Community awareness and health education given by the peripheral team on isolation of cases and vaccination, hygiene and sanitation.
KA/CHI/2026/32/1307	Karnataka	Chitradurga	Suspected Food Poisoning	42	0	05-08-2026	07-08-2026	Under Surveillance	Cases of abdominal pain and vomiting were reported from Village Devara Marikunte, Sub-District Challakere, District Chitradurga. District RRT investigated the outbreak. Cases fell ill after eating mid-day-meal at Valmiki high school Devaramarkunte. Cases were treated at GH Challakere. 2 patients were treated at DH Chitradurga. All cases recovered. The affected age group was 5-15 years. Community awareness and

									health education given by the peripheral team on vector control measures, hygiene and sanitation.
KA/RAI/2026/32/1308	Karnataka	Raichur	Suspected Food Poisoning	18	0	05-08-2026	05-08-2026	Under Surveillance	Cases of loose motion, abdominal pain and vomiting were reported from Village Sindhnur (Rural), Sub-District Sindhnur, District Raichur. District RRT investigated the outbreak. Cases were students and staff of Dr. B. R. Ambedkar Government Pre-Metric Girls Hostel Sindhnur who fell ill after eating food at the hostel mess. KL/ERA/2026/32/1311	Kerala	Ernakulam	Hand Foot and Mouth Disease	6	0	07-08-2026	07-08-2026	Under Surveillance	Cases of fever, rashes on hands and face were reported from Village Ernakulam North High Court, Sub-District Kanayannur, District Ernakulam. District RRT investigated the outbreak. Active search for fever cases was done. All cases were aged 2 years. Cases were treated with supportive medicines. Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
KL/ERA/2026/32/1312	Kerala	Ernakulam	Chickenpox	21	0	07-08-2026	07-08-2026	Under Surveillance	Cases of fever, body pain and rash were reported from Village Mulamthuruthy (CT), Sub-District Kanayannur, District Ernakulam. District RRT investigated the outbreak. The affected age group was 26-86 years. Cases were clinically diagnosed with chickenpox. Community awareness and health education given by the peripheral team on isolation of cases, hygiene and sanitation.

KL/ERA/2026/32/1313	Kerala	Ernakulam	Dengue	33	0	05-08-2026	05-08-2026	Under Surveillance	Cases of fever, myalgia, vomiting and nausea were reported from Village Thundathiparambu Arpana Road, Sub-District Kochi, District Ernakulam. District RRT investigated the outbreak. Both children and adults were affected. 5 blood samples were collected and tested for IgM antibodies at RPH Lab, Ernakulam, and all 5 tested positive for dengue. Fogging and source reduction activities were conducted in the affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/ERA/2026/32/1314	Kerala	Ernakulam	Dengue	22	0	03-08-2026	05-08-2026	Under Surveillance	Cases of fever with myalgia were reported from Village Kanayannur (CT), Sub-District Kanayannur, District Ernakulam. District RRT investigated the outbreak. The affected age group was 16-76 years. 34 blood/serum samples were tested by NS1 and ELISA at UPHC Kuthapady, Maj Hospital, AIMS Hospital, and Cooperative Hospital, of which 8 tested positive for dengue. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/IDU/2026/32/1315	Kerala	Idukki	Chickenpox	8	0	03-08-2026	03-08-2026	Under Surveillance	Cases of fever with vesicular rash, headache and back pain were reported from Santhigiri College, Vazhithala, Sub-District Thodupuzha, District Idukki. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Cases were in the age

									group 18-22 years. The cases were diagnosed clinically. College administration was sensitized to isolate a symptomatic student for 7 days. Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
KL/KOL/2026/32/1316	Kerala	Kollam	Dengue	54	0	06-08-2026	06-08-2026	Under Surveillance	Cases of fever, headache, myalgia, chills, diarrhea were reported from Village Uliyakovil, Divisions 16 (Uliyakkovil), 17 (Uliyakkovil East), and 18 (Kadappakada), Sub-District Kollam, District Kollam. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at UPHC Uliyakovil. The cases were above 30 years of age. 293 serum samples were collected at UPHC Uliyakovil and tested for dengue by NS1 antigen and IgM card tests, of which 54 tested positive. Entomological surveillance revealed increased vector indices in the affected divisions at the time of investigation. Fogging was done. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/KOZ/2026/32/1317	Kerala	Kozhikode	Dengue	38	0	01-08-2026	03-08-2026	Under Surveillance	Cases of fever, headache, myalgia, and rash in a few cases were reported from Village Beypore, Sub-District Thodupuzha, District Kozhikode. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at FHC Beypore. The age of patients ranged from 1–80 years. The most affected age group was 25–44

									years. Out of 38 blood samples collected, 33 tested positive for Dengue NS1 antigen and 3 tested positive for Dengue IgM by ELISA at RPH Lab, Kozhikode. NS1 card testing was conducted at FHC Beypore (6 cases), General Hospital Kozhikode (8 cases), Koyas Hospital (11 cases), and other private facilities, including Star Care Hospital, MIMS, and BMH. Fogging was done in the affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
MP/MOR/2026/32/1318	Madhya Pradesh	Morena	Dengue	13	0	04-08-2026	05-08-2026	Under Surveillance	Cases of fever with body pain were reported from Village Bandhpura, Sub-District Jaura, District Morena. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at PHC Bharra. Cases of all age groups were affected. Out of 13 blood samples collected, 3 samples tested positive for Dengue (NS1 Ag ELISA). Anti-larval activities and fogging was done. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
MP/NIW/2026/32/1319	Madhya Pradesh	Niwari	Chickenpox	6	0	08-08-2026	08-08-2026	Under Surveillance	Cases of fever with rash were reported from Village Maharajpura, Sub-District Orchha, District Niwari. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated symptomatically. The affected age group was 4-12 years. 3 serum samples collected and sent to GMC Bhopal, tested negative for Measles and

									Rubella (IgM ELISA). Cases were clinically diagnosed with chickenpox. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MP/PAN/2026/32/1320	Madhya Pradesh	Panna	Measles	19	0	05-08-2026	05-08-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Tala (Bhatiya Muhalla), Sub-District Shahnagar, District Panna. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated symptomatically. The affected age group was 2-10 years. 5 blood samples collected, tested positive for Measles (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
MP/RAT/2026/32/1321	Madhya Pradesh	Ratlam	Acute Diarrhoeal Disease	68	0	07-08-2026	07-08-2026	Under Surveillance	Cases of loose motion and vomiting were reported from Village Barkhedi, Sub-District Jaora, District Ratlam. District RRT investigated the outbreak. House to house survey was done. The common source was drinking water from wells. Cases were treated at PHC Badavada. A medical camp was established in the locality. Medicine and ORS packets were given to cases. The affected age group was 6-80 years. 2 water samples collected tested negative for Total Coliform and Faecal E. Coliform bacteria. Chlorination of well water was done. People were advised to consume boiled water for drinking purpose. Community awareness and health

									education given by the peripheral team on safe drinking water, hygiene and sanitation.
MP/REW/2026/32/1322	Madhya Pradesh	Rewa	Scrub Typhus	19	0	09-08-2026	08-08-2026	Under Surveillance	Cases of fever with body pain were reported from Village Madhi, Sub-District Mangawa, District Rewa. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at CHC Gangeo. Cases were in the age group 2-60 years. Out of 19 serum samples collected and sent to Medical College Rewa, 13 samples tested positive for O. tsutsugamushi (IgM ELISA). Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
MP/SHI/2026/32/1323	Madhya Pradesh	Shivpuri	Suspected Food Poisoning	59	0	03-08-2026	03-08-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Satanwada Kalan, Sub-District Shivpuri, District Shivpuri. District RRT investigated the outbreak. Cases developed symptoms 4-5 hours after eating food at a bhandara. Cases were treated at CHC Satanwara. All cases recovered. The affected age group was 6-70 years. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
MH/BHA/2026/32/1324	Maharashtra	Bhandara	Acute Diarrhoeal Disease	37	0	03-08-2026	04-08-2026	Under Surveillance	Cases of abdominal pain and loose watery stools were reported from Village Walani, Sub-District Pauni, District Bhandara. District RRT investigated the outbreak. House to house survey was

									done. The probable cause of the outbreak was pipeline leakages in the water supply system. Cases were treated at aPHC Asgaon. Both children and adults were affected. 2 stool samples collected, tested negative for cholera by culture. Pipeline leakages were repaired. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
MH/GON/2026/32/1325	Maharashtra	Gondia	Acute Diarrhoeal Disease	33	0	07-08-2026	09-08-2026	Under Surveillance	Cases of loose motion and vomiting were reported from Village Wadegaon, Sub-District Deori, District Gondia. District RRT investigated the outbreak. House to house survey was done. Cases were treated symptomatically. 8 patients were treated at PHC Mulla and 4 patients at RH Deori. The affected age group was 46-65 years. 4 stool samples collected, showed growth of no enteropathogens by culture. Water samples collected and sent to DPHL Gondia were unfit for drinking purpose. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
MH/NAN/2026/32/1326	Maharashtra	Nanded	Dengue	20	0	03-08-2026	05-08-2026	Under Surveillance	Cases of fever with myalgia and body ache were reported from Village Kopra, Sub-District Kinwat, District Nanded. House to house fever survey was done. Cases were treated at PHC Jaldhara TR. The affected age group was 19-42 years. 6 serum samples collected and sent to GMC Nanded, tested positive for Dengue (IgM ELISA). Anti-larval

									activities and fogging was done. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
MN/TAM/2026/32/1327	Manipur	Tamenglong	Fever	78	1	04-08-2026	05-08-2026	Under Surveillance	Cases of fever with body pain were reported from Village L.Pabram, Sub-District Tamenglong, District Tamenglong. District RRT investigated the outbreak. The affected age group was 0-12 years. House to house fever survey was done. Cases were treated at Tamenglong District Hospital. 19 blood samples and 6 nasopharyngeal swab samples were collected to test for Scrub typhus, dengue, malaria and covid. All tests done on RDK at the village. No positive findings were reported. 1 death was reported in a 2-years-old-male child on 02.08.2026. Anti-larval activities and fogging was done. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.
MN/THO/2026/32/1328	Manipur	Thoubal	Suspected Food Poisoning	59	0	07-08-2026	07-08-2026	Under Surveillance	Cases of vomiting and abdominal pain were reported from Village Waithou Bazar, Sub-District Lilong, District Thoubal. District RRT investigated the outbreak. The cases fell ill after eating home cooked wild mushrooms. Cases were treated at District Hospital. Thoubal. All cases recovered. The affected age group was 4-70 years. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.

NL/MON/2026/32/1329	Nagaland	Mon	Fever with Rash	63	0	01-08-2026	04-08-2026	Under Surveillance	Cases of fever with maculopapular rash were reported from Village Lapa Lampong, Sub-District Tizit, District Mon. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated symptomatically. MR vaccine was given to children in the affected area. The affected age group was below 15 years. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
NL/PER/2026/32/1330	Nagaland	Peren	Meningococcal Meningitis	1	1	03-08-2026	05-08-2026	Under Surveillance	A 14 year old male from Sainik School, Punglwa was admitted to PICU, CIHSR Hospital, Dimapur with high fever, vomiting, low BP, confusion, abnormal limb tightening and fast spreading purplish skin spots.
